Seminar Objectives & Booking Information

About the Seminar

The APSE Energy Summit 2026 is once again being held in Glasgow and the aim of the event is to ensure officers and councillors from local authorities have the chance to keep up to date with a vast agenda. Discussion sessions, speakers and partners will cover a range of issues and the informal element of the event means that delegates have the chance to discuss and debate even more amongst themselves. The Summit is a real chance to reengage with the sector and catch up on what is happening across the climate change, energy and sustainability agenda in terms of government initiatives, case studies, good practice and market trends. The issues raised in the Summit will be relevant to all councils across the UK and the content will support the APSE Energy vision of ensuring local authorities are as informed as they can be about policy, technologies and approaches as possible.
