What's next for community energy? A local authority perspective

Lorna Edwards

Community Energy Project Manager

**£1 million spent
on energy every
day in Bristol**

Bristol's Energy Service

Our Investment team leads on renewable energy installations and community energy projects which help local people to invest in clean energy like solar power.

Our Warm Up Bristol scheme is an initiative designed to make the private housing stock in Bristol more energy efficient to create cosier, healthier homes and reduce carbon emissions.

This scheme focuses on projects which will improve Bristol's energy security. We're working on installing heat and energy networks to supply more efficient and lower carbon heat and power to the city.
