

Flashes of Wigan and Leigh National Nature Reserve - What Makes it Special?

The Wildlife Trust for
**Lancashire
Manchester &
North Merseyside**

Wigan 
Council

Martin Purcell, Greenheart Officer, Wigan Council

Dr Mark Champion LWT Wigan Projects Manager

Legacy and development of the concepts

Our National Nature Reserve is a result of its post-industrial past.

Building on the work put in by a number of organisations since the 1980s, Great Manchester Wetlands is spearheading a step-change in nature recovery – Wigans Landscape is the flagship project at its heart.

The NNR will deliver a huge amount and will demonstrate how partnership working can meet mutual goals and we have proven the benefits of connecting people and nature.

We have developed activity that has a lasting impact and is sustainable.

Everyone's achievements will continue to be built on and this will continue.

A Long History of Coal Mining

Mossland and wet
grassland prior to mining

Mining important between
1800s and 1970s

Other industries included
foundries, cotton mills
and engineering

Collieries in Wigan

1000 coal mines
in the Wigan area

Wigan was the centre
of the Lancashire coalfield

Canal and rail transport hub

The Way We Were

Westwood Power Station

- The power station
- created Fly ash (PFA)
- Plants found belong to coastal dune systems
- Power Station
- demolished in 1989

Wigan's Challenge

The Derelict Land Survey, 1974, showed Wigan had 1045 Ha of derelict land

Third highest incidence in England (Kerrier, Cornwall topped the list with 1283 Ha)

One-third of the derelict land
In Greater Manchester

Including colliery spoil heaps (580 Ha), abandoned railway land, metaliferous spoil, subsidence flashes and other industrial dereliction

Urban Significance

- 224 NNRs in England but very few Urban NNRs
- Main way to protect high-value nature conservation land from inappropriate development
- In 2006, opportunities for public enjoyment of nature 6 million people live within half an hour's travel
- Case study to modernise the NNR selection criteria

The Pilot

- Large amounts of engagement with over 40 workshops held on zoom
- Needed evidence to prove good enough to be designated
- Community ambitions for these places
- Comments supporting the aims of the NNR

Importance for Wildlife

Includes 2 SSSIs, 12 Local Wildlife Sites
and 4 LNRs

Approx. 800ha of
shallow open water
bodies and wetland
habitats

Over 52 pairs of the
nationally rare
Willow Tit and wider
breeding bittern (0.5% of national
population)
and breeding wetland
birds such as water rail (0.97% of England
population)

Potential for People

Sites within an area of high deprivation

Shared vision for engagement and education

Great public access and rights of way

Landscape scale approach and use of the sites by visitors

What are National Nature Reserves?

Statutory purpose

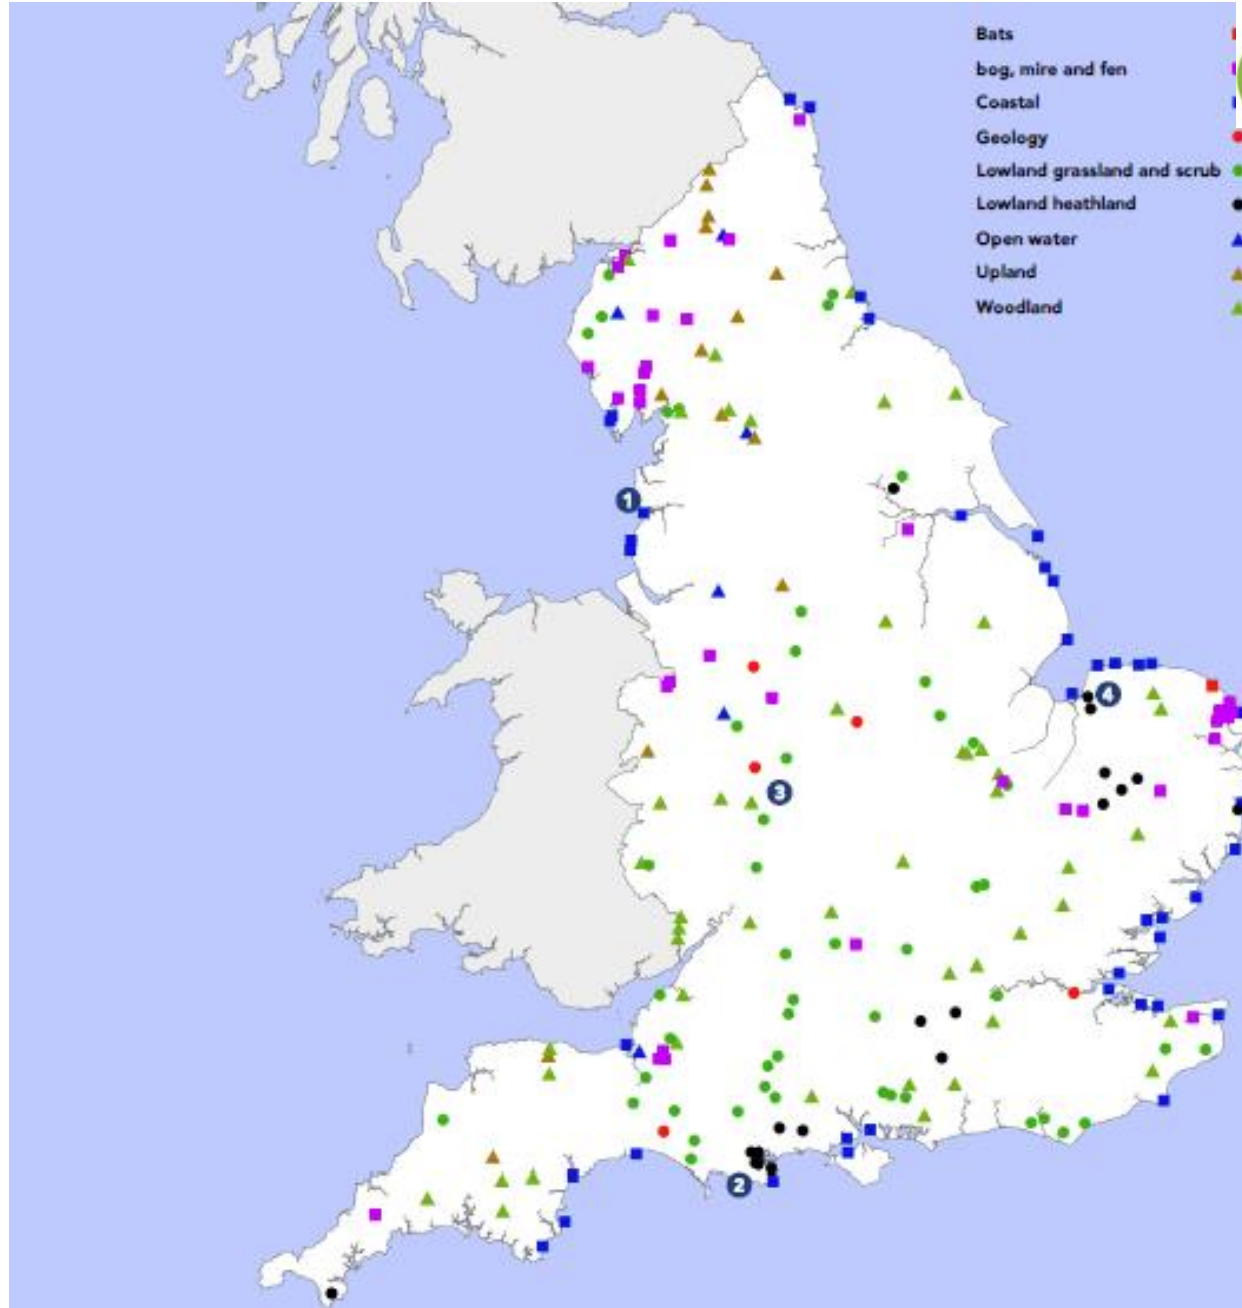

- First established through the 1949 Act
- Conservation purpose - including for research and study, or preservation, or both;
- Purpose further extended through NERC Act 2006
- Recreation purpose – enjoyment of nature and open air recreation, provided this does not compromise the conservation purpose

England's National Nature Reserves

Strategic themes

- Conservation: the most important places for nature; Lawton; Nature Recovery Network
- Science: learning, sharing, developing best practice
- Engagement: behavioural change, participation, impact
- Partnerships: shared brand & values, working across priority landscapes
- Resources: new investment, influencing, up-scaling

NNR Management Standards

The Wildlife Trust for
**Lancashire
Manchester &
North Merseyside**

Wigan 
Council

- 9 Standards which:-
- Set out the common principles for the management of NNRs
- Developed initially by Natural England for their NNRs
- Welcomed by the NNR Partnership and across our Approved Body partners, now being adopted widely across the NNR Series

Management Standard 1: Simply The Best!

The Wildlife Trust for
**Lancashire
Manchester &
North Merseyside**

Wigan 
Council

Management Standard 2: Management Planning

Management Standard 3: An exemplary NNR

The Wildlife Trust for
**Lancashire
Manchester &
North Merseyside**

Wigan 
Council

Management Standard 4: Landscape Scale

The Wildlife Trust for
**Lancashire
Manchester &
North Merseyside**

Wigan 
Council

Management Standard 4: Landscape Scale

The NNR will create new relationships and started new conversations –

The broader agenda – themes that Carbon Landscape has been pioneering are now being recognised widely in the UK as best practice and being firmly embedded - e.g. local nature recovery, green recovery, slow the flow, natural flood management, carbon storage, wellbeing through nature, the value to society and the economy of healthy natural systems

Management Standard 5: Public Enjoyment

The Wildlife Trust for
**Lancashire
Manchester &
North Merseyside**

Wigan 
Council

Management Standard 6: Knowledge Sharing

An Urban Landscape Scale NNR fit for the future

The Wildlife Trust for
**Lancashire
Manchester &
North Merseyside**

Wigan[♥]
Council

- Exemplify the ‘Three pillars’:
 - » Conservation
 - » Science
 - » Engagement

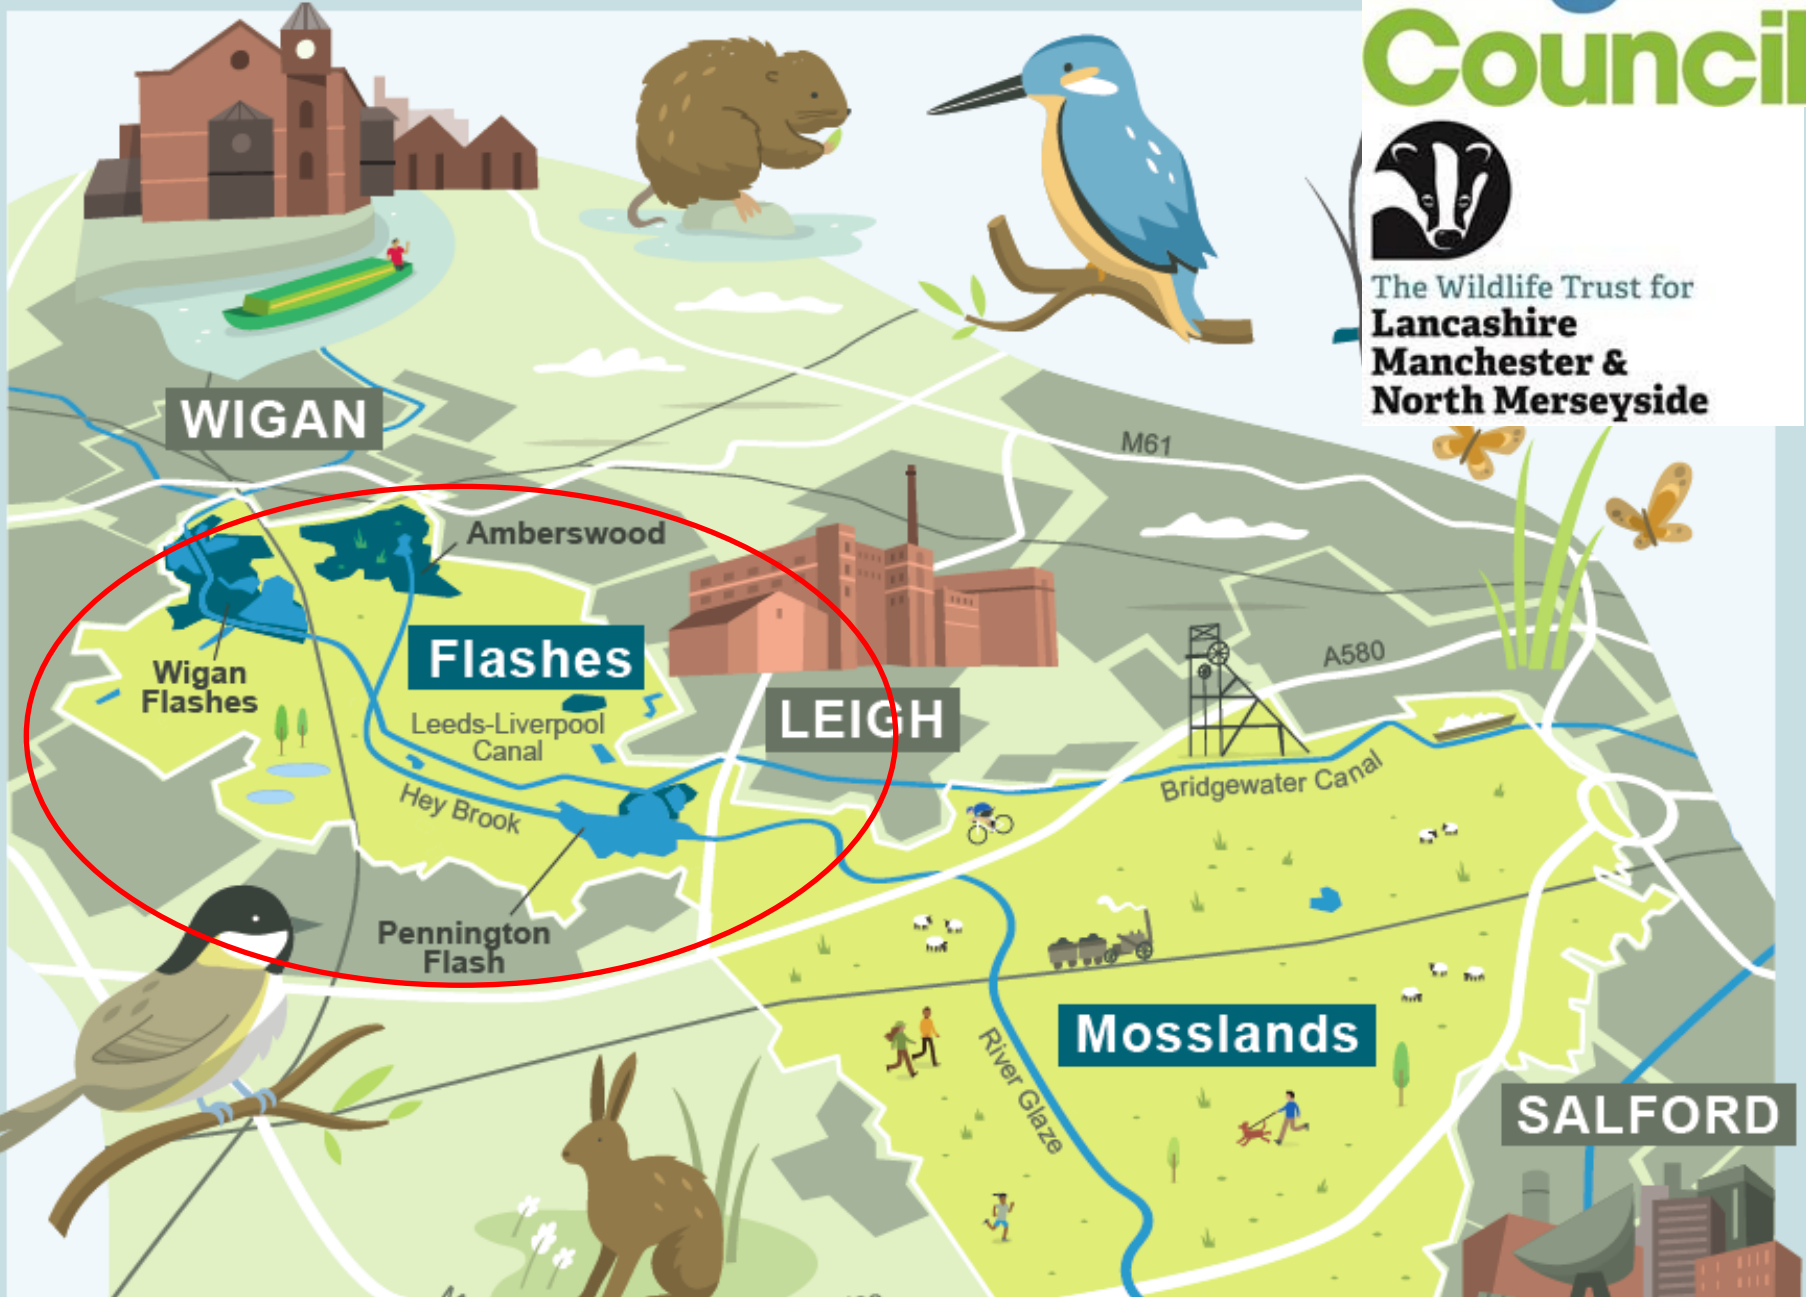

- Adaptive network of ecosystems and natural landscapes
- Collaborative, working with communities and partners
- Exemplary management, leading evidence-based best practice
- Highly valued and sustainable - new resources and investment, new contributors, valued by society
