## **Data Issues/Barriers**

- A lot of Data in different places and platforms.
- Bringing all the data together.
- Data visualisation.
- Important to have staff buy-in.
- User friendly.
- Draw in relevant data.

## **Edinburgh & Confirm**

- Carriageways & Footways, Structures, Street Lighting, Parks & Greenspace, Waste.
- Safety Inspections & Defect Repairs.
- Capital Investment Next step

• Spectrum Spatial Analysis (SSA)

## **Using Data Effectively**

- Data brought together from numerous sources.
- Better inform investment strategies and roads asset management policies:
- Better capital renewal scheme decision making (analysis of SRMCS and DVI).
- Data visualisation is very user friendly.
- Data verification.

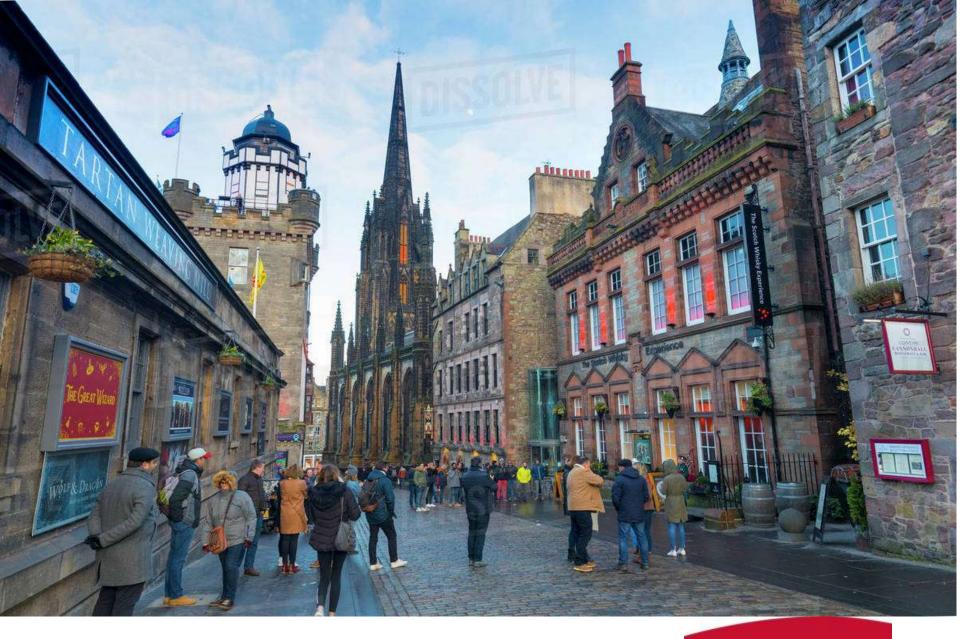

#### **Other Data Sources**

- Edinburgh World Heritage Site
- Conservation Areas

### **Other Data Sources**

- Developer Contributions (S75)
- Other local authority investment priorities:
  - Active Travel
  - Road Safety
  - Placemaking
- Local Development Plans

#### **Summary**

- Always have a strategy for using data.
- Use multiple data sources to build up effective investment strategies.
- Accurate data will lead to effective cost savings.
- Have confidence in data.
