

APSE Energy Update

Charlotte Banks,
Energy Research & Project Officer,
APSE Energy

APSE Energy Update

- APSE Energy's new ECO document
- Results from our Solar Survey & the UK Solar Summit
- New Salix funding for Scotland
- Upcoming Scotland APSE Energy Summit October 2023

ECO4 and the Great British Insulation Scheme

A guide for local authorities

ECO Document

- An up-to-date view of ECO4 and the newly launched Great British Insulation Scheme and how to make best use of both of these schemes
- Who is eligible, which measures can be applied for and the minimum requirements to be achieved from the funding
- How as a local authority you can utilise the ECO scheme to support the most vulnerable residents
- Webinar: 07 September 10am – 11:15am
www.apse.org.uk

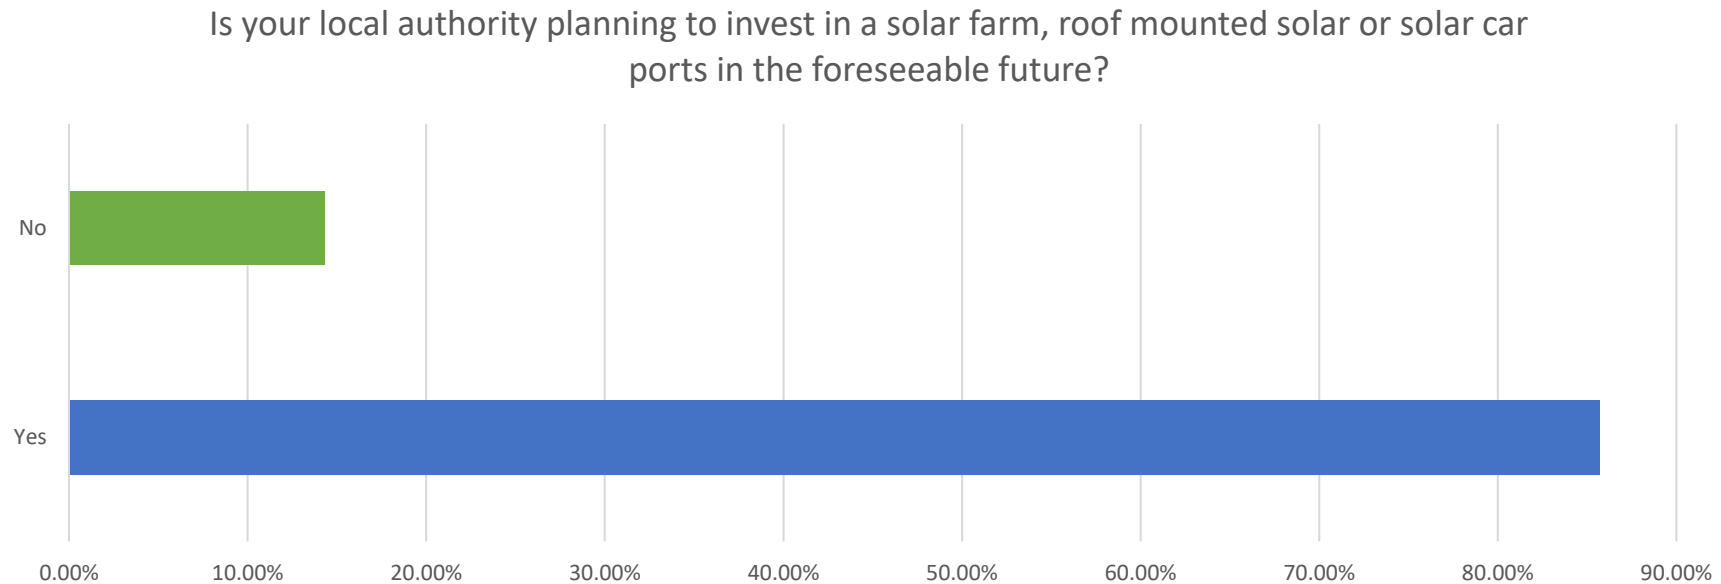

Solar Survey & the UK Solar Summit

- APSE Energy was asked to speak at the UK Solar Summit in London at the end of June 2023
- Myself and one of our associates Steve Cirell were on a panel of speakers discussing local authority solar opportunities
- The main things we discussed were opportunities for using local authority assets differently to capitalise on solar opportunities. Such as third part solar (Warrington), car park canopies (Falkirk, Nottingham...)
- Event was heavily focused on solar playing a key role in the UK's decarbonisation plans. 70GW by 2035. Powering up Britain.
- Before the event we sent out a survey to APSE Energy members...

Solar Survey & the UK Solar Summit

•Q1. Is your local authority planning to invest in a solar farm, roof mounted solar or solar car ports in the foreseeable future?

New Salix Funding for Scotland

- Scotland's Public Sector Heat Decarbonisation Fund
- £20 million grant funding available within this financial year under Scotland's Public Sector Heat Decarbonisation Fund which will be delivered by Salix
- The fund allows for applicants to apply for single or multi-year funding to support the delivery of their heat decarbonisation and/or energy efficiency project(s)
- Once applications are received by Salix they will undergo a quality-based assessment and the highest scoring applications will be approved for funding. The time of submission will have no impact on the assessment outcome, provided that the portal is not closed
- APSE Energy can help!
www.apse.org.uk

Scotland APSE Energy Summit 2023

- 2nd & 3rd October in Glasgow
- Currently have around 90 people attending the Summit
- Topics include:
 - Solar investment (**North Ayrshire Council**)
 - Progress with hydrogen (**Moray Council**)
 - Developments in wind energy
 - Scottish Public Sector Heat Decarbonisation Fund.
 - Panel discussion on LHEES (**Scottish Government, Fife Council & East Lothian Council**)
 - Future proofing housing stock (**North Lanarkshire Council**)
 - Panel discussion on EV charging (**ABB E-Mobility, Scottish Borders Council & Durham County Council**)
 - Decarbonising buildings (**APSE Energy associates**)
 - Energy procurement (**eEnergy**)
 - Collaboration through a Sustainable Energy and Climate Action Plan steering group (**Angus Council**)
 - Sustainable Dundee & the Council's climate fund (**Dundee Council**)
