# About

## From Simpler Recycling to Local Government Reorganisation, ETS to EPR to DRS, it's all happening here...

### About the Seminar

This seminar will look at the future of waste and recycling, and address the new waste legislation including simpler recycling, extended producer responsibility, mandatory food waste collections, and the wider implications of local government reorganisation for many districts. We will also be exploring the circular economy and key innovations.

Join us to hear from policy leaders and experts from government, including the **Circular Economy Minister**, and agencies from across the UK.

We will also hear leading case studies and share best practice from local authorities striving to meet targets within the scope of the new waste legislation and show innovation in wider areas such as the circular economy and reuse.

A fabulous opportunity for elected members, officers, and other key stakeholders to hear the latest from government, ask questions, share thoughts and views on how they are meeting the growing environmental agenda, operational and financial challenges to create a better, safer and more sustainable environment - for present and future generations.

Join us to hear directly from government, policy and local authority leaders and a chance to network with colleagues and share best practice and innovation through our Innovation Awards!
