SUMMARY

1. CONTENUR IN THE UK

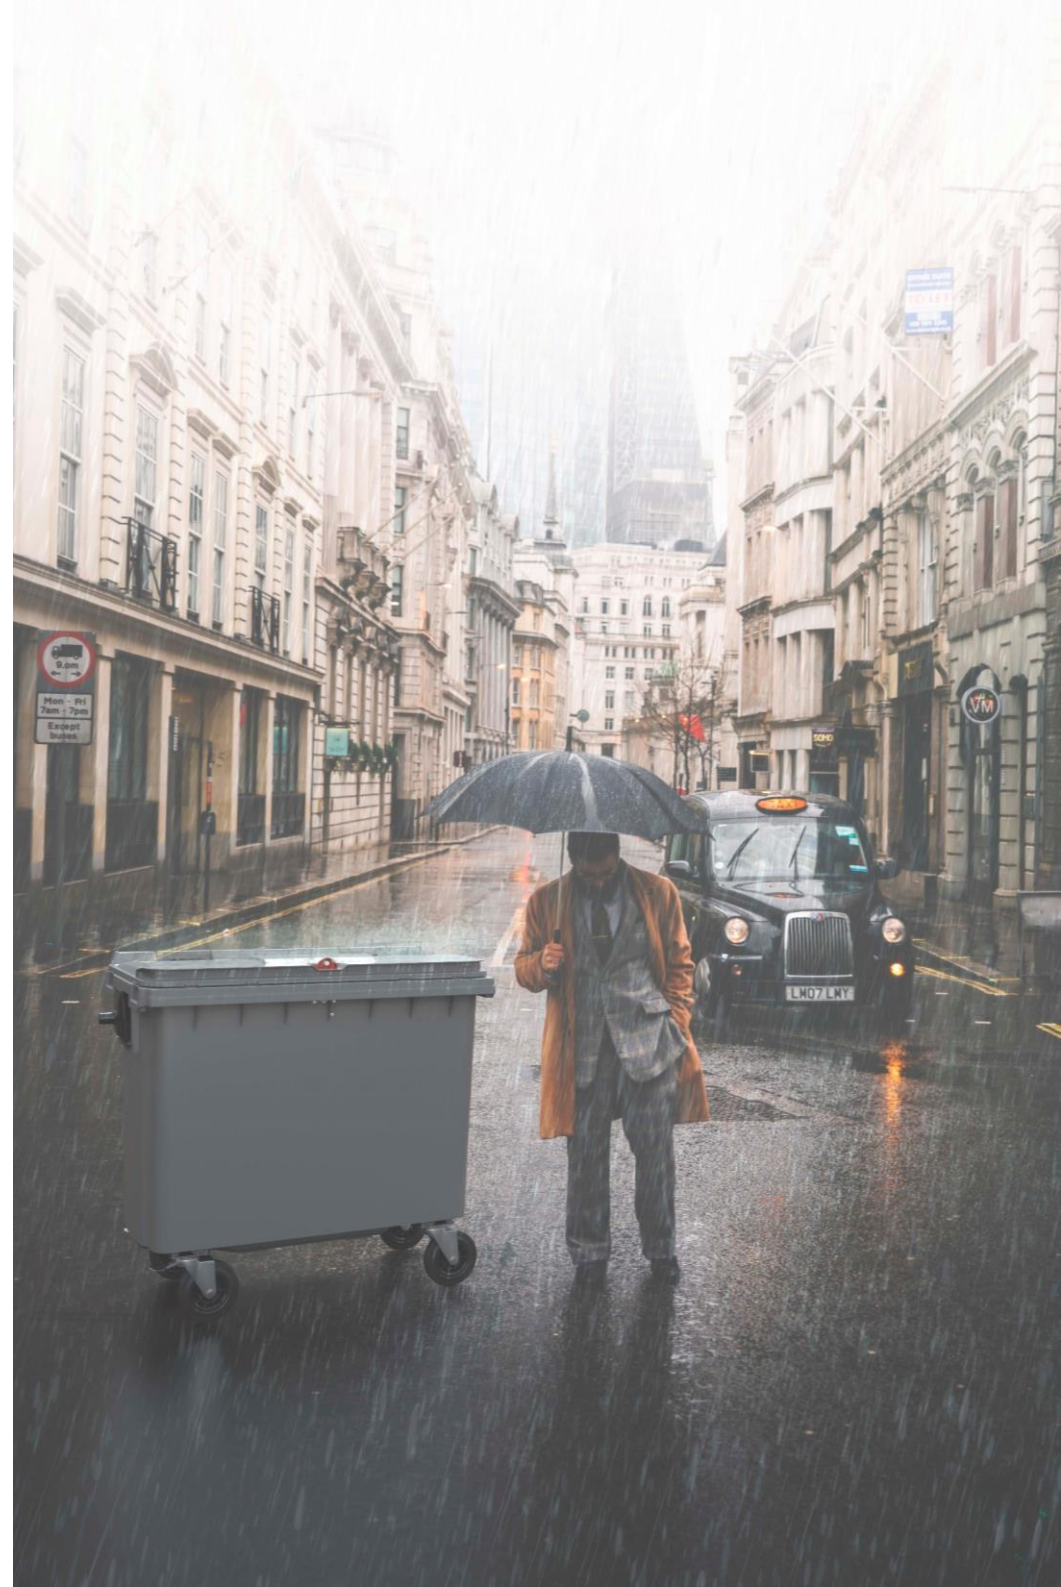

Contenur started its activities in the UK in 1999.

Commercial office in Lancashire, soon to relocate to new Factory location on Merseyside.

Over the years we've played a solid role in the UK market and have become leaders in the 4 wheel plastic commercial waste segment and the hospital clinical bins market.

Contenur are renowned for:

- ✓ High level of service provision, with KPI driven performance for major customers.
- ✓ Production flexibility, we can provide highly bespoke solutions including accessories, colours, and highly visible colour labelling, helping to drive recycling behaviour.
- ✓ Short lead times and quick delivery of tailored solutions for customers.

2. CURRENT INDUSTRIAL PROJECT

- In 2018 Contenur gave the green light for investment in a state-of-the-art production facility in the UK.
- This new plant will be operational from March 2021.
- Contenur is growing globally - this will be the 4th plant in the Contenur group, alongside Spain, Poland, and Brazil. We are committed to investing in production capacity to meet increasing demand.

► MAIN FACTS

- Located in Knowsley (Liverpool).
- Capacity to produce around 600 K units of containers (2 and 4 Wheel bins combined).
- Highly complimentary addition to the UK 2 wheel bin market, currently dominated by 2 suppliers – further customer choice.
- Room for future capacity growth as the market dictates.
- Stock holding space.
- The plant will be certified ISO 9001 , 14001 and OHSAS 18001 along with the rest of the plants within the group.

3. PRODUCTION

- Contenur UK will produce 140 l, 240 l, 660 l, 770 l and 1100 l flat lid containers from day one.
- We also have the capability to produce the 180 l product in the UK if the market demand is strong enough (we have the flexibility of moving moulds between production units to match customer needs).
- The 360 l container will be produced in Spain for the moment, due to comparatively small market requirements.

4. CERTIFICATION

- All products will hold certificates of compliance for EN 840 and the RAL equivalent.
- The 240 I, 660 I, 770 I and 1100 I containers will also hold UN 3291 certification for hazardous waste transport.
- Contenur UK will have extensive laboratory testing facilities in Knowsley to ensure ongoing strict compliance of incoming and outgoing materials.
- Contenur UK are currently on UK frameworks for 4 wheel containers (ESPO, YPO, Excel) and WILL be approved for 2 wheel containers in early 2021 (YPO) and late 2021 (ESPO and Excel).

5. UNDERGROUND REFUSE SYSTEMS

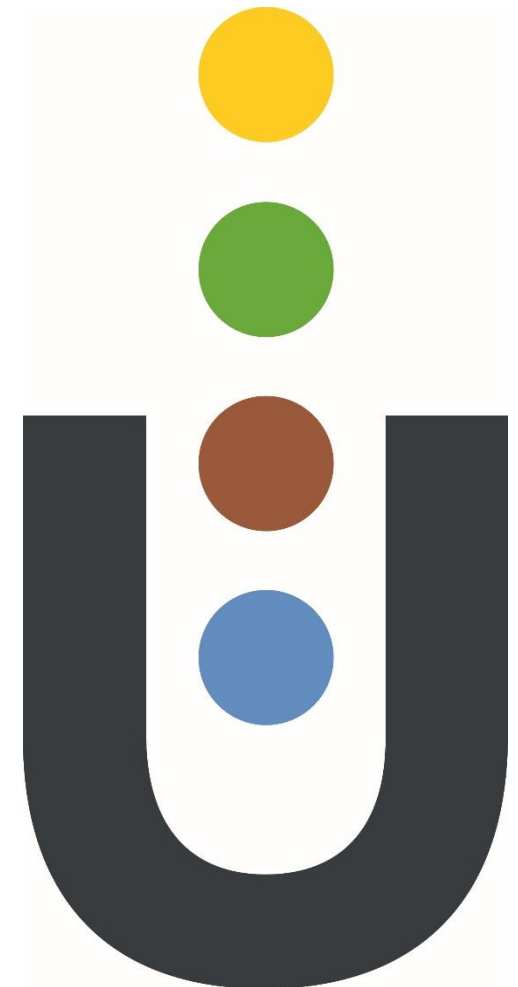

- Contenur have been manufacturing URS systems since 2011
- Crane Lift, Hydraulic and Side Loader systems
- Global market with 1000's of systems made every year
- Ideal for modern regeneration or LA extension planning
- Operational savings of up to 70% for Servicing Authorities over traditional wheeled bins.
- Encourages Recycling
- All products are EN13071 compliant
- New APSE UK framework provides compliant route to market for LA's

6. SUMMARY

CONTENUR UK has a commercial team of 10 professionals with a wealth of industry experience at your service

- LONG TERM PLAN – UK MANUFACTURING
