

Next steps for APSE Energy...

- **Publication on impact of local authority energy companies on energy market and ultimately fuel poverty**
- **Build APSE support capacity around specialities like heat networks, for short term capacity injections**
- **Analyse asks that have already been made on energy in devolution bids, raise awareness and encourage authorities to push boundaries and think big.**

- **Gather case studies of local authority achievements in energy projects across the UK and publicise with DECC, Government and Local Government.**
- **Broaden and develop capacity, knowledge and network around energy efficiency, both domestic and non-domestic.**
- **Raise APSE profile with DECC and OFGEM**
- **Make sure we make the most DECC's offers of support – including financial support**

- **Need to grow our relationship with partner organisations like REA, Walker Morris, UX energy and of course WELink**
- **APSE energy to increase the awareness and knowledge of members about battery storage, smart metering and other technological advances**
- **Support members to engage with local SME's and how they benefit from the energy agenda**

- **Share information about good and bad suppliers, providers, products...identify the cowboys!**
- **Demand side management**
- **Build on solar experience and frameworks**
- **Links to the electricity market – PPA's, selling power, capacity market, national grid contracts**
- **Energy efficiency**
