Case Study

Aims

- Drive down costs of Street Sweeping
- Maintaining cleansing standards
- Keeping residents / members satisfied
- Data for analytics

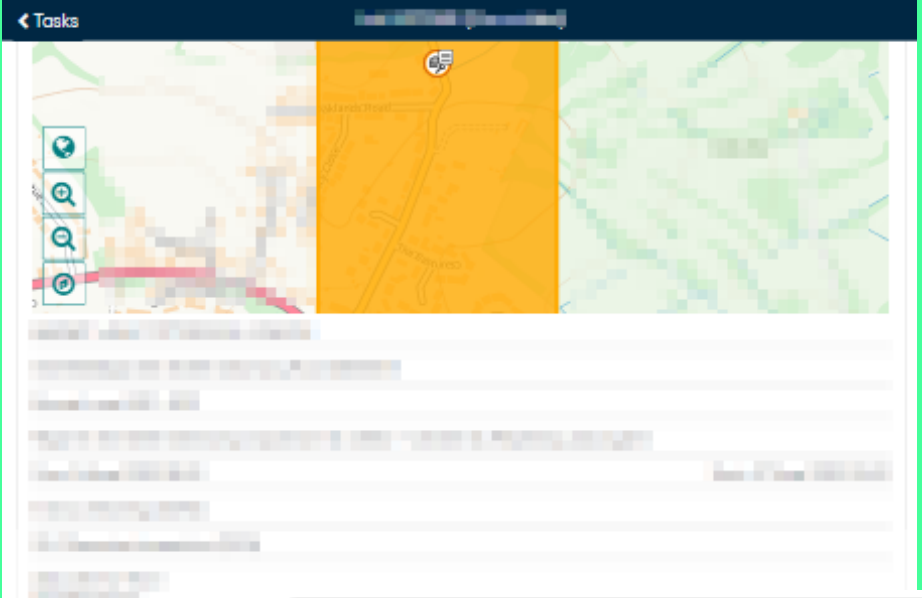

Case Study

Methodology

- Digitised street sweeping routes
- Work sent directly to device
- Trained operatives to grade the street prior to sweeping
- Trust judgement of staff to make the call as to sweep or not
- If street was swept, record the grade after

▼ Job Attributes

Grade Before C (C)

Grade After A (A)

Sub-allocate Job

▼ Photos

An initial photo has not yet been taken

Start Other Status

► SOR Items

This form is a modal window for editing job attributes. It features a grey header with a dropdown arrow and the text "Job Attributes". Below the header are two rows, each with a label on the left and a dropdown menu on the right. The first row is labeled "Grade Before" and has a dropdown menu showing "C (C)". The second row is labeled "Grade After" and has a dropdown menu showing "A (A)". Below these rows is a section titled "Sub-allocate Job" with a small arrow icon. Underneath is a "Photos" section with a dropdown arrow and two buttons: one with a camera icon and another with a folder icon. A red warning banner below the photo buttons contains the text "An initial photo has not yet been taken". At the bottom of the form are two buttons: a teal button with a warning triangle icon and the text "Start", and a white button with the text "Other Status". At the very bottom, there is a grey bar with a small arrow icon and the text "SOR Items".

Case Study

Findings

- Reduction in paper
- Reduction in lose of data
- Live information about the cleanliness of the streets
- Photos allowed for more audits via the desktop
- A wealth of data to analyse
 - Job start time finish time
 - Length of time / grade improvement
 - Time since last sweep / grade degradation

Case Study

Bonus

- Empowerment of cleansing staff
- Easy access to cleansing records when asked
- Ability to capture carbon cost of each street cleaned
- Live data straight into their Reporting Tools via API

NetZero and Carbon Monitoring

Helping you:

- **Create baseline data**
- **Capture carbon “cost”**
- **Use data to guide intelligent decisions**

Culture Change

On track for Net Zero targets

Baseline

- ✓ Materials
- ✓ Waste

Assets

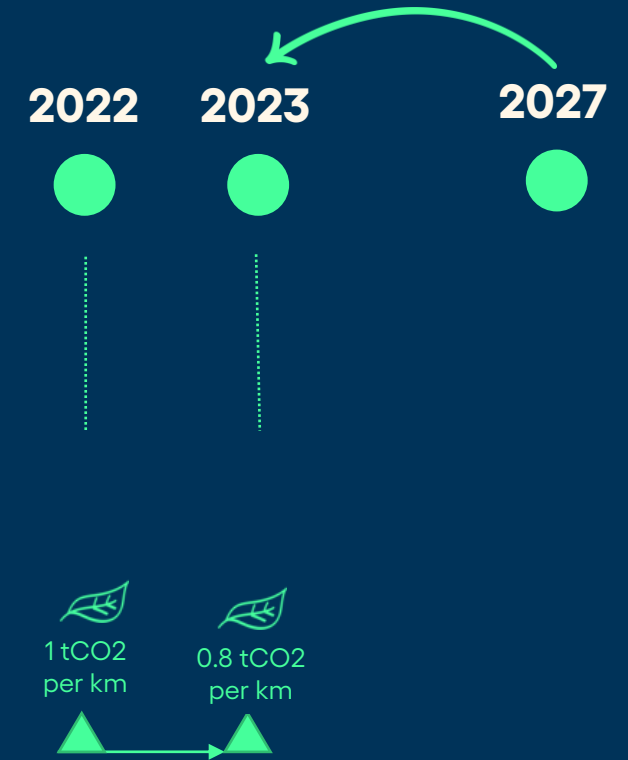

Data-driven decisions

Improvement strategies allow for reductions in carbon ahead of time, presenting choices like

- Move all small O&M vehicles to EV
- 95% Pavement works use Recycled Materials
- 30% waste reduction vs. Landfill
- 20% reactive works moved to planned works
- Soft estate data sequesters increased by 10%

Thank you
