About the seminar

Local Authority Fleet operations are the essential element in ensuring the continued delivery of front-line Council services. This has been tested during the current pandemic and in most cases operations have successfully delivered throughout. This seminar looks forward and brings together the elements that influence future success.

Speakers will cover the national picture, the regulatory context, human, financial and legal issues and strategies for maintaining efficient operations. The seminar will also take a look at innovation, self-regulation and ensuring continued efficient delivery of fleet services.
