

Brightly

Brightly, a Siemens company, is the global leader in intelligent asset management solutions, enabling organisations to transform the performance of their assets. Brightly's sophisticated cloud-based platform leverages more than 20 years of data to deliver predictive insights that help users through the key phases of the entire asset lifecycle.

SMARTER ASSETS, SUSTAINABLE COMMUNITIES

We partner with more than 12,000 clients in diverse industries across the globe so they can better manage and optimize their assets and operations through the key phases of the asset lifecycle. Our sophisticated, cloud-based platform leverages more than 20 years of data to deliver predictive insights to help our clients prevent the next flood or leak, avoid a costly power outage or equipment failure, and repair city streets and bridges when they need it most.

SOFTWARE FOR SMARTER ASSETS

From preventing a leak to avoiding a power outage to repairing city streets and bridges, Brightly helps clients through the key phases of the asset management lifecycle. Designed to simplify and help oversee every detail of your assets and operations, our data-driven solutions enable you to eliminate waste, avoid undue costs and work smarter.

Brightly pairs its complete suite of intuitive software – including CMMS, EAM, Strategic Asset Management, IoT Remote Monitoring, Sustainability and Community Engagement – with tailored consultancies and award-winning support services to light the way to a bright future where we can all thrive.

Based in the UK, Advanced Electric Machines (AEM) designs and manufactures electric motor technologies that deliver next-generation performance, efficiency, and sustainability. Our innovative motors eliminate the need for rare earth materials, making them safer and environmentally friendly.

At AEM, we are excited to introduce our latest innovation: the aftermarket HGV Hybrid Kinetic Energy Recovery System (KERS). This cutting-edge solution is specifically designed to help fleet operators reduce diesel consumption and lower emissions in their existing diesel HGV fleets. Our KERS technology captures and stores kinetic energy that

Exhibitor profiles

would otherwise be lost during braking, and then uses this energy to assist the vehicle during acceleration, resulting in significant fuel savings and reduced environmental impact.

The KERS solution is powered by AEM motors. One of the key advantages of our motors is the removal of permanent magnets. This not only enhances safety but also allows our motors to freewheel, offering unique efficiency gains by enabling the vehicle to coast when needed. This feature contributes to a lower environmental footprint and improves overall vehicle performance.

AEM offers a range of powertrain solutions to meet the diverse needs of our global customers. Our HDSRM motor series and SSRD motors are suitable for a variety of applications, including passenger cars, commercial vehicles, off-highway vehicles, and more. We are committed to accelerating the delivery of Net Zero 2050 by reducing diesel consumption immediately while supporting the transition to full electrification with our superior electric motors

Come and talk to us to calculate your fuel savings with the KERS solution.

Heavy Vehicle Garage Equipment Specialists

AES provide industry standard commercial vehicle garage equipment covering truck, bus and van. Established 20 years ago by Russ Coad, AES are a family run equipment supplier covering mainland UK. AES focus on delivering premium garage equipment with a superior aftersales support network helping their clients deliver the best service for their customers.

AES are sole UK distributors for Josam, since 1972 Josam has been a leading brand for products for wheel alignment, collision repair and induction heating, all for the benefit of workshops, fleet owners and the environment.

Josam's wheel alignment technology is approved for use by Scania, Renault Trucks, Volvo Truck and Bus, and Mercedes Truck, Bus and Van, the only commercial wheel aligner approved for Multi-OEM brands.

AES, alongside their Josam product portfolio provide ancillary equipment such as jacks, axle stands and hydraulic tools, providing only quality products from Cattini, Rehobot and other UK and European OEMs.

Aquarius

APSE Transport & Fleet Seminar 2024

CONNECTING TACHO AND VEHICLE DATA TO DRIVE EFFICIENCIES & ALL-ROUND SAVINGS

With the job of today's transport manager becoming more complex than ever, Aquarius IT will be demonstrating how their technologically-advanced suite of integrated compliance and ER approved systems are successfully helping local authorities, make light work of administering and reporting on all areas of fleet management relating to driver, vehicle and workshop activities. The team will show how this connected-approach to tacho and vehicle analysis is helping transport managers derive wider economies of scale for front line council services.

The key focus for APSE Transport & Fleet Seminar will be to show how Aquarius's Tacho Analysis system integrates with the company's Asset Maintenance portal, and defect and eSIGN technologies, providing transport operators with efficiencies for managing, communicating, connecting and reporting on driver activity and vehicle maintenance / inspection.

Mark Johnston, Managing Director at Aquarius, said; "Local authorities have successfully been using our tacho analysis system for many years, and now with the focus on integration to create even greater back-office efficiencies, Asset Maintenance has completed the loop for those with vehicles and assets requiring periodic maintenance or inspection. From any web-enabled device, users have 24/7 visibility of their drivers and vehicles from one log-in."

Asset Maintenance enables users to schedule and plan maintenance events. Uniquely the portal's user-friendly interface allows templates and schedules to be tailored to any asset type and to each parts specification, in turn increasing the visibility, reporting capability and auditability of a fleet.

"Where authorities are deriving maximum benefit from this integrated approach, is by using Asset Maintenance to drill into linked information for defect checks and tachograph data to see the full picture for individual vehicle availability – resulting in reduced VOR, significant cost and time savings, and increased safety and compliance standards. We are looking forward to presenting our solutions at the show," confirmed Mark.

BUCHER

municipal

At Bucher Municipal, we produce only the highest quality machines across the road sweeping, sewer cleaning and winter maintenance industries.

Over the 200 year heritage of Bucher, we've constantly been driven by change, ensuring clean and safe environments, while embedding continuous improvement into everything we do. Our rich history of specialised engineering solutions has led to improved technology, better solutions and has always been driven by a focus on quality and reliability. This experience allows us to focus on the evolution of our products and more importantly adapt our units to be the best they can be for you, and the environment.

As the nation looks towards a greener future, we are pleased to be able to offer an electric vehicle alternative across all our divisions, reducing operational costs and significantly reducing emissions. Our environmental solutions reduce fuel consumption, improve air pollution, and save millions of litres of fresh water annually.

Bucher Municipal is a brand you can trust & rely on. With six strategically placed service centres and over fifty factory trained engineers at your disposal, we have got you covered if anything goes wrong and support is always within easy reach.

Technology is shaping the way the world operates and our industry is no exception. At Bucher Municipal, we are releasing our revolutionary new data & insights platform - Bucher Connect. It changes the way you operate, saving time, money and unnecessary stress. Problems can be remotely diagnosed and quickly fixed, routes can be planned and data can be analysed to maximise your machine's efficiency, thus reducing costs.

At Bucher Municipal, we strive to develop intelligent solutions that enable you to meet current demands and stay ahead of future change, leading the way towards smarter technologies and alternative energy sources.

Bucher Municipal - Driven by Better

The Fleet Auction Group
Setting standards to lead the industry

protruck
AUCTIONS
part of The Fleet Auction Group

As a trade-only vehicle remarketing company, with full on-going traceability and best practice at its heart, The Fleet Auction Group is the ideal partner for the defleeting and remarketing of all your **Local Authority** assets. As an alternative option we have our **Protruck Auction** site which has an open-door policy.

Our '**Local Authority**' partners wholly endorse our exclusive trading policies. Those public sector vendors who have chosen to use our unique facilities recognise that we are at the cutting edge of asset disposal. They reinforce that we are simply in tune with our public sector vendors. We have a dedicated auction for **All Local Authority Cars, Light Commercial & Heavy Commercial Vehicles, WAV, Bus, Coach, Plant, Machinery, Grounds Maintenance Equipment & Motorcycles**.

'**Best Value**'. Our results driven philosophy ensures that the fleets we partner achieve consistently high residual values, high conversion rates and a fast return of net funds – and all backed up by accurate reporting and 'good old fashioned' customer service.

Our Head Office & online auction centre is situated in the centre of the UK, the purpose-built complex has the latest live media studio's embracing our entire auction disposals including the collection and storage of all your assets. You would expect nothing less from a company that has built solid foundations within the Local Authority Sector. Protruck, our dual physical and online auction centre is located just East of Doncaster and has the exact same solutions for end-of-life vehicle and plant disposals on behalf of the Local Authority sector.

'**Best Practice**'. Our unique ethical trading stance will ensure onward traceability and accountability for every vehicle sold: we are the only Auction that operates a 'Trade Only' policy. We do not accept cash payments and all our buyers hold a valid VAT registration number and a verified bank account. By using our facilities you're Fleet or Transport Manager supports the very best in Corporate Social Responsibility.

The Fleet Auction Group & Protruck is gaining strong residual value results in the Car Fleet, Commercial, Municipal, Agricultural and Plant remarketing sector with service levels that reinforce our product knowledge is second to none.

The Fleet Auction Group along with Protruck was most recently voted Auction House of the Year 2016, 2017, 2018 and 2019 at the annual Commercial Motor Awards.

Please contact **Chris Jager** at **The Fleet Auction Group** on 01530 833535 or mobile 07970 056383, email chris.jager@fleetauctiongroup.com

Exhibitor profiles

Fleet management within the public sector can be challenging.

With so many different fleet compositions, operational requirements and drivers to manage, it can be tough to keep track of things, not to mention time-consuming, especially when using disparate management systems and processes.

And when everything takes longer than it should, it can be even harder to stay within budget.

With Jaama and Key2 it's different. Everything is managed in one place, in one system. We make it our business to understand your organisation and your requirements, we help you select the modules to meet them and Key2 will deliver greater control, improved efficiency and levels of service.

We also know that Key2 gives you the tools to:

- Strategically analyse your fleet
- increase efficiency
- ensure vehicle compliance
- reduce operating costs
- manage all of your drivers
- Produce performance reports.

Our fully integrated, innovative software solutions will save you time and help control and reduce costs whilst ensuring full compliance with legislative requirements. Our technology is designed to make sure things run smoothly and you are in full control.

Don't just take our word for it, Jaama supply fleet and workshop management software to many public sector and local authority organisations covering areas such as:

- Fleet and asset management
- Workshop management including touchscreens and stores management
- Daily checks and defect reporting via an app
- Grey fleet management
- Fully integrated driver licence checking and driver management
- Automated reporting including tailored APSE reporting and DVSA integration

To find out more and discuss your requirements in further detail, please contact roy.baynham@jaama.co.uk or call 0844 8484 333 option 2. Alternatively request a call back or a consultation online and one of our experienced Business Development Managers will get back to you.

Exhibitor profiles

Our main objective at Octane is to provide a fast and efficient service for our customers. We have over 50 years combined experience within the industry along with a team of dedicated and committed staff ready to supply you with a professional service to meet your requirements.

Fuel Management Systems

Octane are the UK distributor for MCS Sapphire fuel management systems. The Sapphire range of terminals are used in local authority, bus and transport depots and utilises both card and touchless key technology. The Sapphire range include the Sapphire+ terminal which is weights and measures (MID) approved for resale to local customers/accounts and subcontractors. Compatibility with all major fuel cards makes this system ideal for the business that wants to use one card to control fuel drawn in their own yard and on the road. The Sapphire is a real-time fuel management system reporting back to a cloud-based web portal accessed from any device with an internet connection and a web browser giving full control in any location and also providing automated reporting which can be integrated into most fleet management systems.

Fuel Dispensers

Octane can source from any pump manufacturer within the industry to either match existing units on site or provide a recommended product for your needs. We offer a full reactive and preventative maintenance service for complete peace of mind when buying or maintaining fuel systems.

Civil and Groundworks

We provide all types of civil and groundworks packages, from basic tank pads, pump sumps, up to full turnkey and design & build packages. We have a commitment to excellence and delivering projects on time and on budget.

Interceptor Installations

When it comes to interceptor installation, we've got extensive experience and expertise. In our years of operation, we've installed over 50 interceptors, and we're currently maintaining close to 200 separators for large-scale petrol retailers and smaller retailers alike.

Aviation Fuel Services

Our aviation refuelling systems are specifically designed to preserve and maintain fuel quality as well as protecting the health and safety of all your colleagues, the wider community, and the environment. Our services support AVGAS, JETA1 and UL91 Aviation fuels.

Exhibitor profiles

r2c is a leading provider of connected fleet & workshop management software, specialising in HGV and commercial vehicles for over 20 years. We have more than 125,000 users across 73K fleets and 2,000 workshops around the UK.

r2c allows you to work together with your entire supply chain through one easy-to-use system so that you can invest your time more productively. We provide the platform of choice for companies – big or small – wanting to drive efficiency, reduce risk, increase cost-effectiveness and generate tangible return on investment.

Core Platform

Our core platform is the nucleus that connects your entire supply chain. Use it to collaborate with your repair network for all things compliance and maintenance, and receive a full overview of how your fleet is performing on one interactive dashboard.

Digital Pre-Use Driver App

Enhance your compliant fleet with digital driver checks to save time and manage defects from source. Users can complete checks on a mobile device as part of their daily routine. There's no paperwork to thumb through, just one digital checklist that reports to the platform in real-time.

Vantage Point – Visual Business Intelligence

Reduce risk using our powerful business intelligence tool for detailed analysis on all areas of your fleet. Identify problem areas and target rectifications by putting your data to work, allowing your fleet to be the best it can be.

i2i - Invoicing

i2i is a web-based tool that automates the process for pricing, authorising and invoicing service, maintenance and repair (SMR) work between fleet operators and repairers, including integrations into your finance package.

Additional products are aimed at workshops and include digital job management, stock management, workshop loading and inspections.

Stertil-Koni: THE COMPLETE RANGE

Stertil-Koni have been manufacturing top-of-the-range 2-post, 4-post, In-ground, Skylift, Mobile Column Lifts, and Washbay Vehicle Lifts in the Netherlands and at a manufacturing plant in Illinois, USA since the 1940s. With our commitment to quality and innovation, we're proud to be the World's No. 1 commercial vehicle lift specialist.

Our comprehensive range caters to all workshop and washbay lifting needs. Operating hydraulically, our lifts offer an exceptional price-to-performance ratio while meeting or exceeding the world's highest safety standards.

In the UK, all Stertil lifts are installed, commissioned, and maintained by our own Garage Equipment Association (GEA) accredited and factory-trained engineers, ensuring the utmost in reliability and safety.

Proud supporters and sponsors of APSE for over a decade, Stertil boasts a vast customer base across UK councils and associated services. Our Mobile Column Lifts and Sky Washbay vehicle lifts are among our most popular products, chosen for their quality and durability.

Whether it's for replacement lifts, workshop upgrades, new garage facilities, or compliance with legislation due to the introduction of a new washbay facility, Stertil-Koni is your trusted partner. We have the expertise and product range to meet all your workshop vehicle lifting requirements.

Exhibitor profiles

ULEMCo

ultra low emission mileage company limited

ULEMCo Ltd is the world's first hydrogen commercial vehicle conversion company, enabling fleet and commercial vehicle owners to deploy zero emission hydrogen fuel, as part of their strategies to reduce transport-related carbon emissions.

ULEMCo is based in Liverpool, UK and was founded in 2014 to commercialise its globally unique UK capability in hydrogen technology to convert commercial vehicles (from LGV to HGV and specialist utility vehicles like refuse trucks, gritter and sweepers) to run on hydrogen. Today, this is achieved using either the company's technology for hydrogen dual fuel, or applying know-how and experience to developing zero emission engine vehicles and hydrogen fuel cell integration.

There are nearly half a million heavy duty trucks on the road in the UK alone; all of them need to be decarbonised by 2050! Battery electric technology is just not practical for most of these vehicles, whereas hydrogen with its fast refuelling and higher energy density offers a far better option. Using hydrogen instead of conventional fuels enables fleet managers to upgrade their existing assets to benefit from a reduced carbon footprint without delay, while still having the full range capability of standard diesel vehicles.

Alongside various partners, ULEMCo already supports a fleet of vehicles across a range of hydrogen hubs in the UK, and is rapidly extending its capability to provide 'fleetwide conversion to hydrogen' across the globe.

Our Technologies:

- H2ICED® Dual Fuel Technology
- FC Rx™ Fuel Cell Range Extender
- HyVerie™ Fuel Cell HGV
- HYICE™ Zero Emission H2 combustion
