BUCHER municipal

At Bucher Municipal, we produce only the highest quality machines across the road sweeping, sewer cleaning and winter maintenance industries.

Over the 200-year heritage of Bucher, we've constantly been driven by change, ensuring clean and safe environments, while embedding continuous improvement into everything we do. Our rich history of specialised engineering solutions has led to improved technology, better solutions and has always been driven by a focus on quality and reliability. This experience allows us to focus on the evolution of our products and more importantly adapt our units to be the best they can be for you, and the environment.

As the nation looks towards a greener future, we are pleased to be able to offer an electric vehicle alternative across all our divisions, reducing operational costs and significantly reducing emissions. Our environmental solutions reduce fuel consumption, improve air pollution, and save millions of litres of fresh water annually.

Bucher Municipal is a brand you can trust & rely on. With seven strategically placed service centres and over fifty factory trained engineers at your disposal, we have got you covered if anything goes wrong and support is always within easy reach.

Technology is shaping the way the world operates and our industry is no exception. At Bucher Municipal, we have released our revolutionary new data & insights platform - Bucher Connect. It changes the way you operate, saving time, money and unnecessary stress. Problems can be remotely diagnosed and quickly fixed, routes can be planned and data can be analysed to maximise your machine's efficiency, thus reducing costs.

At Bucher Municipal, we strive to develop intelligent solutions that enable you to meet current demands and stay ahead of future change, leading the way towards smarter technologies and alternative energy sources.

Bucher Municipal - Driven by Better

At **SPACE&PLACE** (S&P), we believe in creating Architecture for Human Beings. It's our mantra and the reason we do what we do. Our work rethinks how buildings are designed and used, inspiring spaces and places that enhance social value, strengthen local economies, protect our environment, and, above all, make people smile.

For us, it's never just about awards or recognition; it's about making a tangible difference in people's lives through the way they experience the places we create. Every year, the buildings we've designed are used over **100 million times** by people of all ages and abilities. That's both a huge responsibility and an incredible opportunity to influence wellbeing, foster inclusion, and support more active, connected communities.

We share a common purpose with our clients to create spaces that link **sport, activity, primary care, rehabilitation, and wellbeing**, driving social and economic benefit for the communities they serve. Our projects act as catalysts for regeneration, creating local employment, improving health outcomes, and delivering lasting **social value** long after construction is complete. We believe that truly sustainable design must also be socially sustainable, empowering local people, celebrating diversity, and enriching community life.

Our commitment to innovation and community-focused design is exemplified by St Sidwell's Point Leisure Centre in Exeter, the UK's first and most energy-efficient Passivhaus leisure centre. Delivered in collaboration with Exeter City Council and the Passivhaus Institute, it reflects our shared ambition to set new standards in **low-energy, high-performance public buildings** that deliver genuine community benefit.

The Columbaria Company will shortly be in a unique position to offer a comprehensive range of memorials manufactured here in the UK alongside our huge range of granite memorials.

We are delighted to announce that from 2026 we will be offering the Luxewood range of environmentally friendly benches, recycled bins, planters, finger posts plus other signage for cemeteries and crematoriums. Alongside our own range of UK manufactured memorials including memorial trees, coppices for urns with porcelain plaques, seasonal friezes, hedges, birdbaths and the all-new 4-sided Meadow Dove Towers made from Cor-Ten steel with 162, 198 or 288 porcelain plaque options at an amazing price. The recycled bins, planters and signage all have branding options so you can choose from no logo, a printed vinyl decal, etched zinc, or an engraved panel logo.

We are now in collaboration with Pinseeker/Luar furniture offering you the superior wood alternative with ultimate durability, UV & weather resistance and zero maintenance. For these reasons, Luxewood is becoming the material of choice for cemeteries and crematoriums.

Our 4ft and 6ft seats will be available with long lasting ceramic plaques that can be inscribed and personalised. With many options for photographs, artwork, military badges, hobbies, sporting themes, the possibilities are endless with bespoke designs. Should the plaques get dirty, a simple wipe down will clean them. An exciting and unique alternative solution to granite, plastic or metal plaques.

We look forward to seeing you on our stand today, for further details on all our memorial products please visit our website www.columbaria.co.uk email columbaria@odlings.co.uk or telephone 01482-387466.
