

Seminar at London Eco Park, November 22<sup>nd</sup> 2016

# Learn how we can help maximize your profits when **GENERATING ENERGY FROM WASTE**

Do you know all the profit opportunities that exist by generating energy from waste?

If so, do you succeed in fully exploiting them to the benefit of your organization?

Over the last years, Bergen Energi has had an expanding business in the GfW sector all over Europe. This has allowed us to develop tailor-made solutions which in turn have given us some extremely satisfied clients.

Some of these clients will share their experiences and some of our energy experts will present how we work and which results we have obtained on behalf of our clients at London Eco Park, November 22<sup>nd</sup> 2016.

The detailed program will be available mid September and it will include topics such as:

- How to get access to the energy market places
- Optimization through trading in short-term and long-term contracts
- How to handle energy market risks
- Overview over renewable opportunities for GfW
- In balance support
- Regulation update
- Facility tour

and much more. One of our customers in the GfW sector, London Waste, has kindly given us use of their conference room and they will be present at the event.

We will be back with further details regarding the agenda. Please register your intention to attend by emailing [martin.hamilton@bergen-energi.com](mailto:martin.hamilton@bergen-energi.com)

Venue: London Waste, London Eco Park

Date: November 22<sup>nd</sup>, 2016
