To all our Cleaning Staff

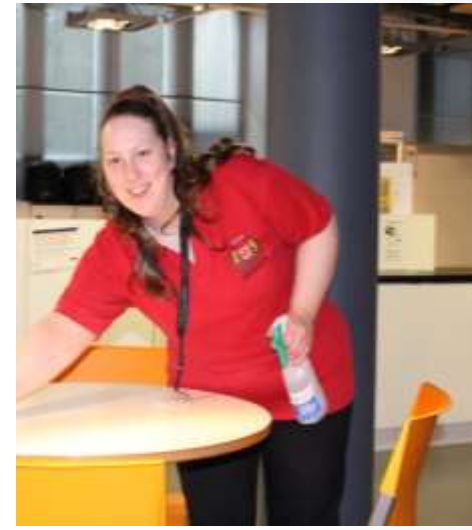

Mary Thompson has been with several council years. Her spare time is taken up with spending time with her grandchildren and family.

Michelle has worked with the Council since her 23 years. She has 11 children and in her spare time she is busy with her 6 dogs!

Jackie Gray has worked with the Council for 16 years. In her time off Jackie is passionate about Grayboards which she recovers and refines.

Infection Control
 The overall goal of infection prevention practices is to alleviate the risk of the transmission of pathogens between all building users.
 However, norovirus known as the winter vomiting bug, is the most common cause of viral gastroenteritis in homes and is easily spread. It affects people of all ages. Each year, it's estimated that it affects between 600,000 and 1 million people in the UK. One way to prevent the spread is handwashing.

HANDWASHING
 It's simple advice, but one of the most important ways of controlling the spread of infection is to remember to wash your hands. You need to wash your hands:
