

Market Engagement Event: Underground Refuse Systems

A one day event at The British Antarctic Survey, Cambridge
Friday 8 June 2018

Friday 8 June

Agenda

9:00am Arrival and coffee

9:30am Welcome, Introductions and arrangements

Andy Mudd, Head of APSE Solutions

09:45 Introduction into APSE's research

Speaker: Andy Mudd

10:15 Developing site for URS

Speaker: Trevor Nicholl, FCIWM, Head of Waste Resources, Greater Cambridge Shared Waste Service

10:45 Coffee & Networking

11:00 Practicalities of fitting URS's

Speaker: Marcus Machell, UK New Product Manager, Contenur

11:30 Supporting Technologies (Fill level sensors) (Practical Research)

Speaker: Paddy Knowles – APSE Senior Consultant & Andy Crofts – Enevo (Islington Project & beyond)

12:15 Networking session and lunch

13:15 User and contractor Perspective

Speaker: Rebecca Weymouth Wood, Policy Manager and Michael Parsons, Operations Manager, Greater Cambridge Shared Waste Service

13:45 Site visit to see system in use: TBA

15:30 Summary and close

About the event

APSE Solutions – Market Engagement Event Underground Refuse Systems and Fill level Sensors

Over the last 2 years, APSE has carried out extensive research into how underground refuse systems (URs) and technological innovations such as fill level sensors that can assist authorities in improving the efficiency and cost effectiveness of both domestic and commercial waste collection services.

We need to look beyond what we perceive as the obstacles to using and installing these systems both in new and existing build areas and consider the longer term benefits of how they could improve not only the immediate amenity of a given area, but also the effect they can have on the overall cost and efficiency of the service both for the residents, the authority and in new build areas for developers.

Now APSE, the foremost public service networking organisation in the UK, in partnership with Cambridge City and South Cambs, Shared Waste Service and APSE Approved Partners Enevo and Contenur, have organised a unique market engagement event for Local Authorities to discuss this innovative collection method, to see these systems in a practical setting and meet with both users and manufacturers to discuss the practical use of these systems.

This unique market engagement event will concentrate on helping authorities understand the benefits of using innovation to improve efficiency and will include:

- The practicalities of fitting URs.
- Use of supporting technologies.
- The user perspective.
- Practicalities of Collections.
- Research case studies.
- Site visit to view a system in use.

There will be ample time for informal networking and discussion about the perceived obstacles to and benefits of using these systems.

In order to ensure that the event is interactive and to facilitate the field study element we have felt it necessary to limit numbers attending to 50 people with an initial 2 person per authority limit. Therefore early booking for this event is strongly advised.

Booking form
