Our mission is to grow green and resilient urban places where people and nature can thrive

High-impact designed mixes, inspired by nature

Sustainable meadow communities for a range of conditions

Native and non-native, for people and pollinators

Engaging, adaptive and resilient

Aimed at garden and urban settings

Our 'Designed Ecology' approach

- Ever-changing seasonal colour combinations
- Sequential flowering, from early to late season
- Sequential heights from low to tall through the season
- Visually stunning displays
- A range of distinct mixes
- Robust, tried and tested

Sundance Annuals

n manan

The 'Vibrant' Annuals and 'Biodiversity Rich' Perennials seed mix ranges, providing high visual, ecological, and resilient planting.

www.pictorialmeadows.co.uk

Vibrant Annuals

- One year display
- Rapid growth, flowers within 6 weeks
- Cheap, easy, reliable
- A useful introduction to meadow style planting
- Great for winning 'hearts and minds'
- Lots of community engagement and positive feedback
- Temporary, 'meanwhile landscapes'
- Around 200 plants per m2
- 100% flowers
- Perform on most soil types
- Long flowering
- Easy to cut down in autumn or winter
- Repeat annually, 3 years on the same site

Vibrant Annuals

Clear the ground of weeds and grass

Cultivate to a fine tilth

Seed is sown in spring

Seed is rolled into the ground

Enjoy your seasons display

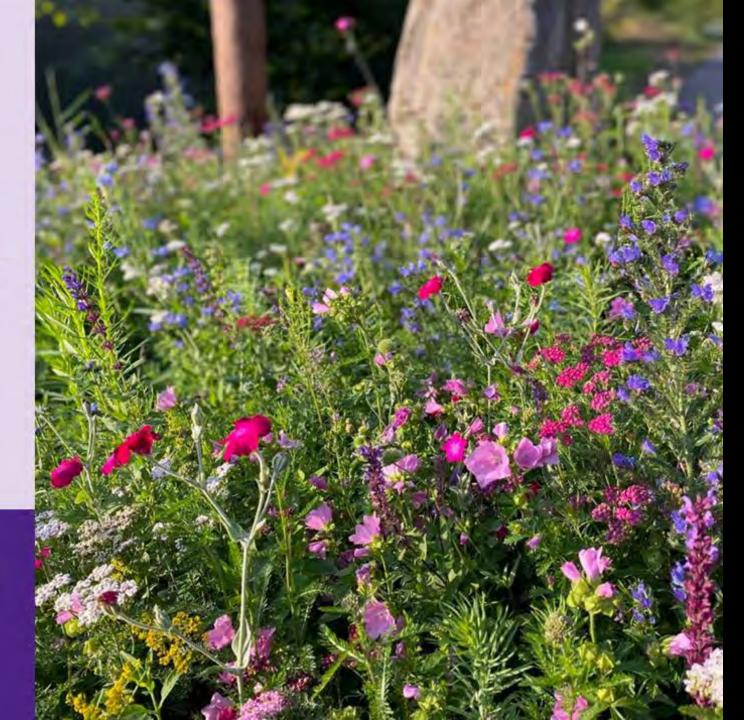

End of season cut and fly

The 'Vibrant' Annuals and 'Biodiversity Rich' Perennials seed mix ranges, providing high visual, ecological, and resilient planting.

www.pictorialmeadows.co.uk

The 'Vibrant' Annuals and 'Biodiversity Rich' Perennials seed mix ranges, providing high visual, ecological, and resilient planting.

www.pictorialmeadows.co.uk

Biodiversity Rich Perennials

The 'Vibrant' Annuals and 'Biodiversity Rich' Perennials seed mix ranges, providing high visual, ecological, and resilient planting.

www.pictorialmeadows.co.uk

Biodiversity Rich Perennials

- Best for normal, heavier and variable fertility soils: 20 PS01 Turkish Delight Very long season flowering
- 21 PS02 Moody Blues Cool colour themed display
- 22 PS03 Woodland Edge For semi shade and early flowering impact
- 23 PS04 Water's Edge Robust periodic wetland and damp clay soils
- 24 PS05 Native Meadow British Native species only

Best for lower fertility, free draining soils, offering more drought resilience:

- 25 PS06 Persian Carpet Dainty with very long season flowering
- 26 PS07 Tuscan Hills Mediterranean style flowers
- 27 PS08 Cottage Garden A colourful, reliable mix for very low fertility including crushed brick

The 'Vibrant' Annuals and 'Biodiversity Rich' Perennials seed mix ranges, providing high visual, ecological, and resilient planting.

www.pictorialmeadows.co.uk

Biodiversity Rich Perennials

- Long-term solution
- Requires skill and attention to detail for
 - Site selection
 - Site preparation
 - Establishment
 - Maintenance
- Designed around distinctive 'impressionistic' colours
- 26-30 different species,150 plants per m2
- Mixes 'evolve' from year to year
- Best sown in autumn, or spring with irrigation
- No board leaved grasses just 100% flowers, or a few fine fescues
- Suited to a range of soil types
- Perennials germinate and grow far more slowly than annuals
- They have a long season flowering period

.....

Cottage Garden PM Perennial Seed

Hilldrop, Essex John Little Grass Roof Company

Cottage Garden PM Perennial Seed

- Weed-free surface mulch
- Slower to establish = more diverse in long-run
- Low fertility = high diversity, less weedy, long-term solution
- Shorter, finer, less green waste, lower maintenance
- 'Design' with substrates, overseed, let the plants find their niche
- Use local aggregates and subsoils
- Avoid importing fertile topsoil that creates low diversity grassland

53

Pictorial Meadows on recycled aggregates

Technique

- Lay out aggregates
- Grade site or create landforms
- Incorporate bulbs
- Sow seed in autumn

Pictorial Meadows on recycled aggregates

www.pictorialmeadows.co.uk

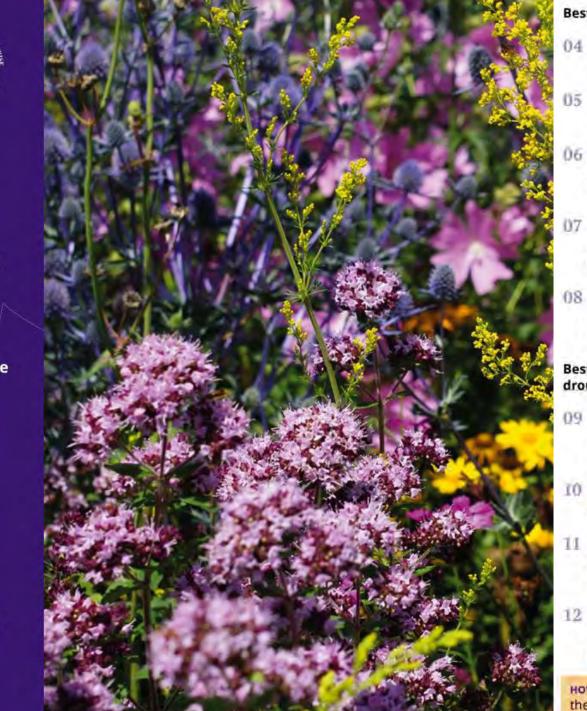

AND SECON CONTRACTOR

Pictorial Meadows Turf

The Adaptive and Resilient Range providing high visual, ecological and robust planting

www.pictorialmeadows.co.uk

Best for normal, heavier and variable fertility soils.

04 PT01 Treasure Chest

A very long season, drought resistant, flower-filled meadow.

05 PT02 Purple Haze

A beautiful long season, cool colour themed meadow.

06 PT03 Woodland Fringe

Best for semi-shade to full sun, heavier, moister soils and for a strong spring impact.

07 PT04 Pollinator Verge

Our lowest growing mix with some salt tolerance and for dry, free draining bioswales.

08 PT05 Rain Garden

An ornamental meadow for rain gardens, pond edges, periodic wet and damp clay soils GROW TO ORDER ONLY

Best for lower fertility, free draining soils, offering more drought resilience.

09 PT06 Patchwork Quilt

A dainty, very long season, flower-filled meadow, predominantly European and UK species.

10 PT07 Indian Summer

A Prairie style meadow with some great late season impact.

11 PT08 Super Pollinator

A Steppe style meadow with bolder form and foliage and some super charged pollinators.

12 PT09 Botanical Skyline

Perfect for green roofs, gravel edges and very dry, shallow light soils.

HOW TO ORDER: By phone 0114 267 7635 or enquire through the website www.pictorialmeadows.co.uk

Pictorial Meadows Turf

The Adaptive and Resilient Range providing high visual, ecological and robust planting

www.pictorialmeadows.co.uk

- Long-term, pre-grown
- Rapid and reliable perennial meadow
- Easy to specify and cost
- Quick and easy to deliver and install
- Higher weed resistance
- Lay anytime, autumn-winter is ideal
- Establishes very quickly, may flower within weeks
- Very long season flowering
- Proven successful now for over 15 years
- Cheaper than pot planted schemes
- Plant densities of around 150 plants per m2
- Great on challenging sites slopes, banks

Meadow turf production, supply and installation

Treasure Chest

NORMAL & VARIABLE FERTILITY SOILS

Multicolour perennial meadow

A robust and reliable designer meadow with an exceptionally long flowering period, ideal for most landscape and garden situations. 29 different flowering perennial species carefully formulated to create densities of over 150 plants per metre.

Preferred moisture range — Tolerance for drought stress and moderate seasonal waterlogging.

Shade tolerance — Best in full sun with some light shade tolerance.

Colour theme — Varied colours with everchanging seasonal interest.

Height details — Generally considered medium height with taller emergence.

Meadow maintenance

Weeding

- 1. Winter-spring, as growth starts
- 2. During summer, catch before seeding
- 3. Autumn-winter, after cut-back

Cut and collect

- At least once a year, usually autumn or winter
- Cut higher, minimise disturbance
- Mid-season cut if flopped, or to encourage later re-flowering

Very weedy site? Try the "Annuals and Review" approach

Step 1: Annuals for 3 years – thoroughly controls perennial weeds, but accumulates annual weeds

Step 2: Then sow the perennials, regular establishment cuts through the first year control any annual weeds

Result: Sown perennial meadow with minimal weed issues

Pictorial Meadows Consultation and Bespoke Mixes

Tap into our team of...

- Landscape Architects

Pictorial Meadows

Why choose Pictorial Meadows?

- 25 years experience
- Partnership with University of Sheffield's Landscape Department
- A 'one stop shop' for
 - Products
 - Professional meadow advice
 - Specialist meadow design
 - Meadow creation and management
- Designed for maximum flowering display
- Rigorous testing and quality control
- Most mixes are majority native, with some non-natives for
 - Longer flowering
 - Climate resilience
 - Increased biodiversity
- Widest range of meadow seed and meadow turf
- Invest in a social enterprise
