to the Grid.

2 solar farms - estimated £150m in revenue over the next 30 years. £58.7m of PWLB borrowing to build the two farms - separate special

purchase vehicles.
Potential rates of return of 8.21% and 11% respectively from selling energy

Up to 16% if so to another customer rather than to National Grid.

Green credentials and an excellent financial return.

Saving £1m on its annual electricity bill - first to be fully powered by green electricity.

Due to be completed by October next year - on low-grade agricultural land.

Commercial returns could be boosted further by the potential co-location of battery storage and electric vehicle charging infrastructure.

The council says that the structure of the deals could allow it to build out facilities on behalf of other councils in future.

Cuts of more than £122m since 2010 and we must save an additional £46m by 2020
