

Rethinking Parks

Funding and support for organisations and partnerships to develop innovative ways of managing and financing the UK's public parks

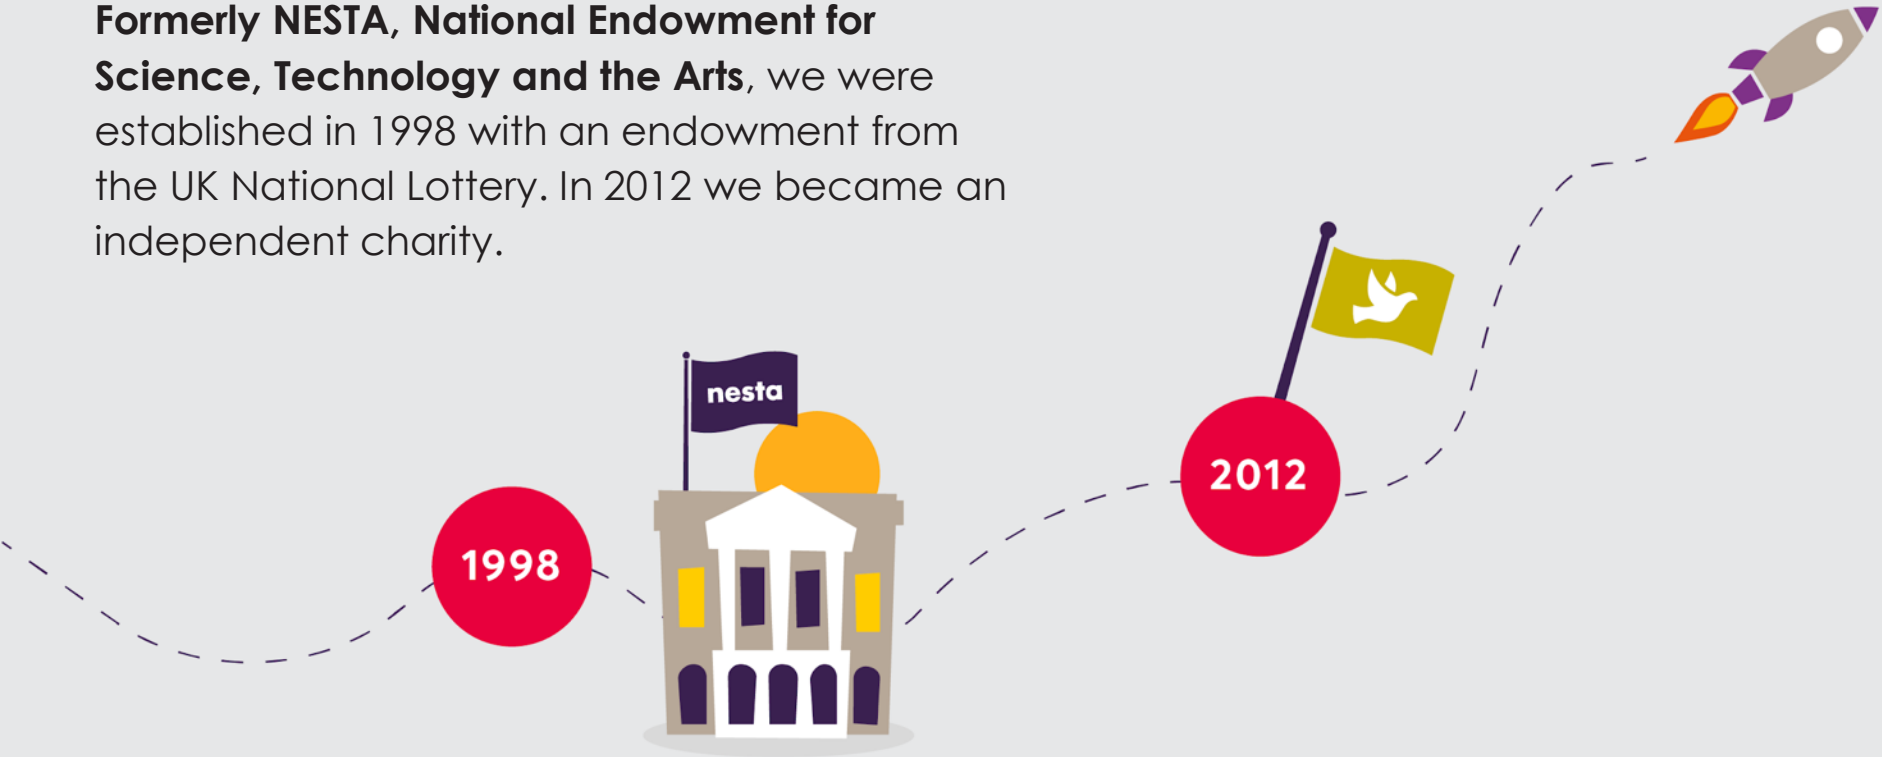

Chris Norris

chris.norris@nesta.org.uk

Rethinking parks

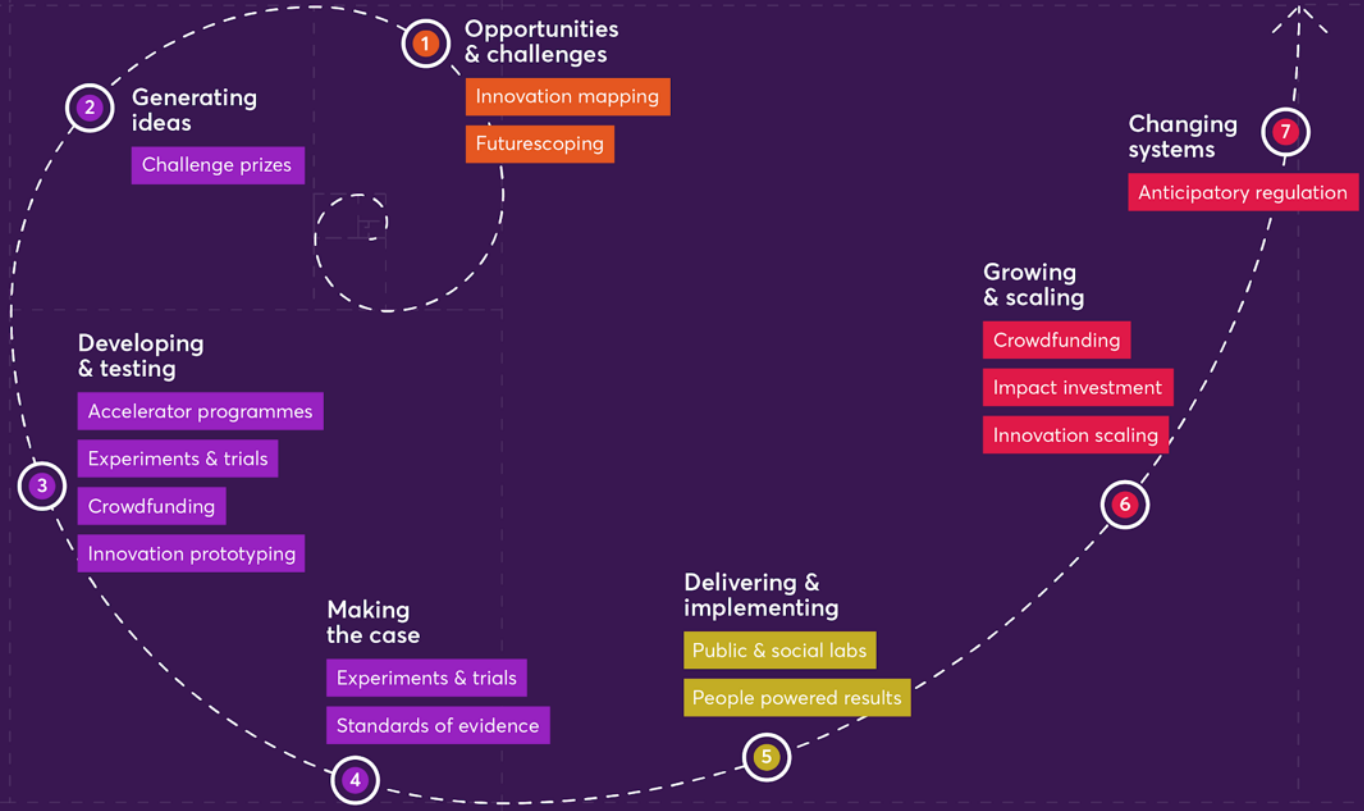

Formerly NESTA, National Endowment for Science, Technology and the Arts, we were established in 1998 with an endowment from the UK National Lottery. In 2012 we became an independent charity.

We work in areas where there are big challenges facing society, from the frontiers of personalised healthcare to stretched public services and a fast-changing jobs market.

What is Rethinking Parks?

Funding and support for organisations and partnerships to develop innovative ways of managing and financing the UK's public parks.

Working together

- Funding from National Lottery Community Fund, National Lottery Heritage Fund
- Management, support, learning from Nesta
- Ideas, delivery, reflection from parks innovators
- Supporting ideas to be tested and adapted elsewhere

Rethinking parks

2014-2016

Building on past work

- 11 projects, c£100k funding per project and support
- A platform to spread ideas
- 7 learning guides

2014-2016

Space and resource to learn and develop

We have been able to fully test our model and take advantage of the ongoing learning from our own project, and from other projects too. Being able to compare findings from around the country has been very beneficial.

Rethinking Parks Participant

Opportunity to capture impact – savings; engagement; income

Moving from a traditional 'closed' understanding of parks and greenspaces towards a more business orientated approach has been most useful. Understanding finances, forecasting, audiences/markets and products/services represent new skills that can be applied across a range of contexts.

streams

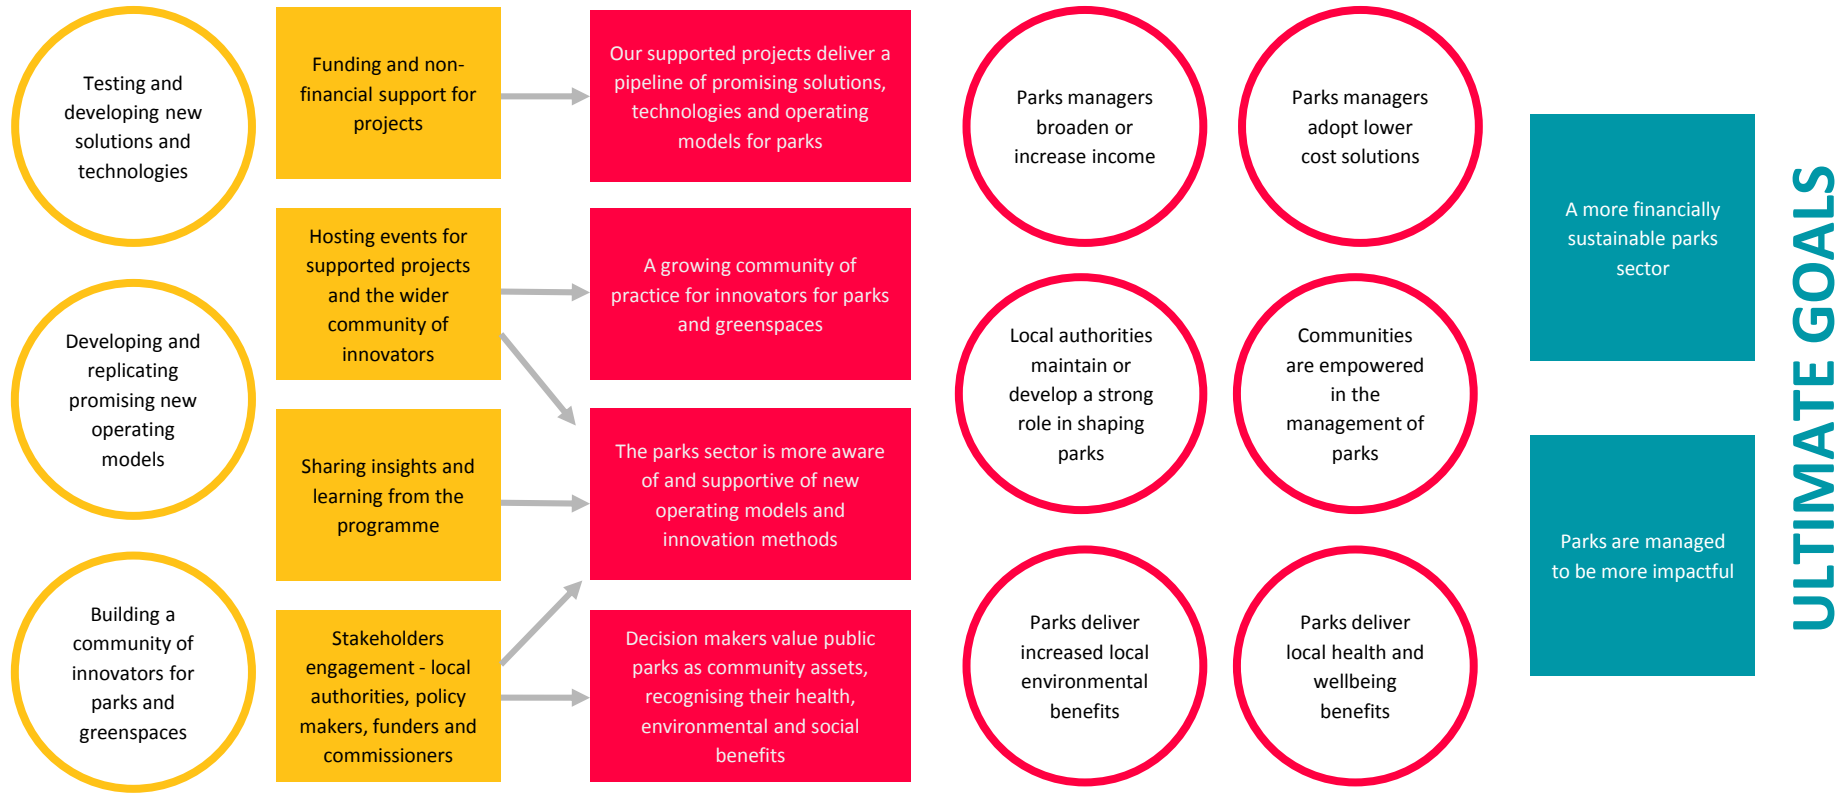

New ways of
working

Core principles and assumptions

1. There is a pipeline of ideas and approaches that the parks sector would and could adopt if tested and funded. **A lack of evidence of 'what works' is currently a barrier to adoption of innovations.**
1. Innovation in the parks sector doesn't just need funding, but also capacity building support including to build a community of innovators and advocates for new approaches. **How can we connect these innovators?**
1. Local authorities cannot work alone in managing public parks, but Rethinking Parks isn't about scaling back their role. In fact, councils need to play a stronger strategic role in shaping green spaces. **How is the role of a parks manager evolving?**
1. There might be many partners involved in each local operating model for parks, but this should always include park users and the wider community being empowered and involved. **What is the right balance of control, power and responsibility between community and parks service?**
1. Parks are key community assets that can't be managed in isolation. There are particularly strong opportunities for greater collaboration with the culture, leisure and health sectors. **There is a continuing challenge in breaking down barriers and making a case for the value of parks.**

RETHINKING PARKS THEORY OF CHANGE

ACTIVITIES

INTERMEDIATE OUTCOMES

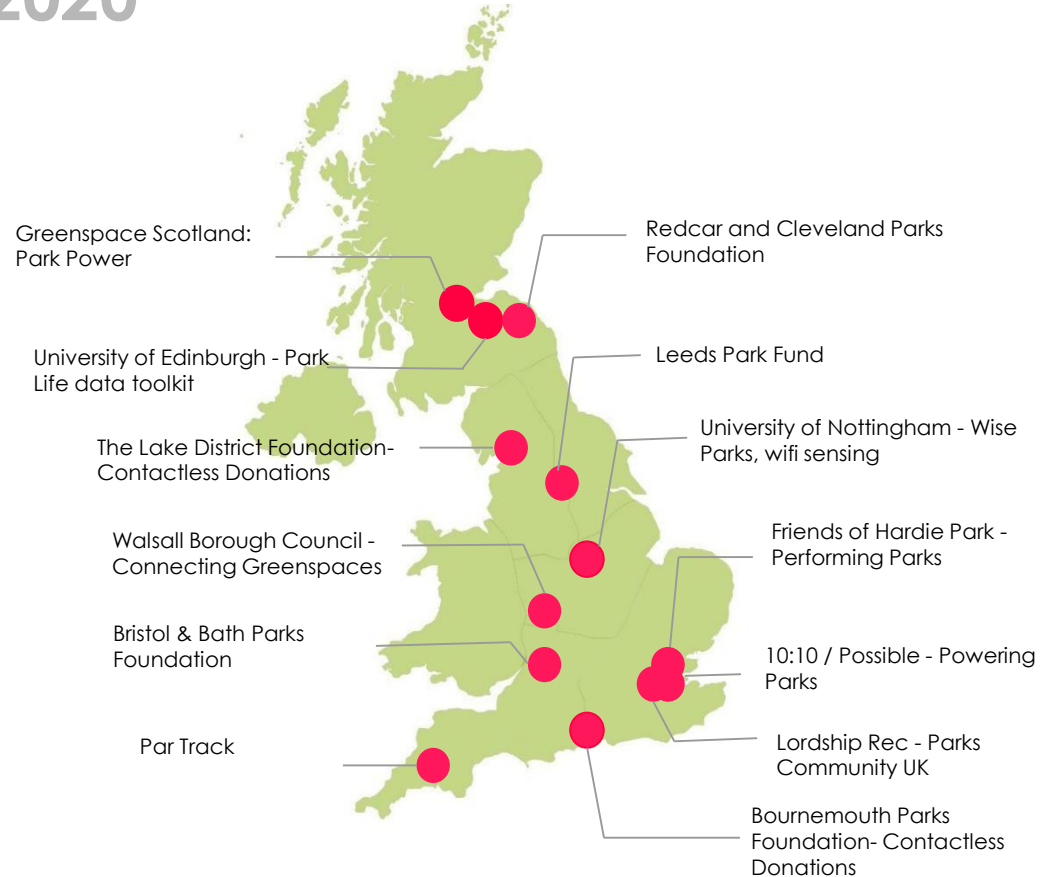

ULTIMATE GOALS

Rethinking Parks 2018-2020

A £2 million fund to support park innovators create a more sustainable future for our parks.

Six clusters of projects

- Digital and data
- Contactless donations
- Parks foundations
- Community Empowerment
- Renewable energy
- Business partnerships

How innovations spread

Source: Everett Rogers (Diffusion of Innovations model)

Clusters

Understanding parks usage through data sensing and analysis tools

Leveraging **renewable energy** technologies to generate new income streams and cost savings for public parks

Effective approaches to **business engagement** and employee volunteering in parks, shared with the parks sector as replicable models

Trialling **digital and contactless donations** in parks

Creating **parks foundations**, working towards wider understanding and adoption across the UK

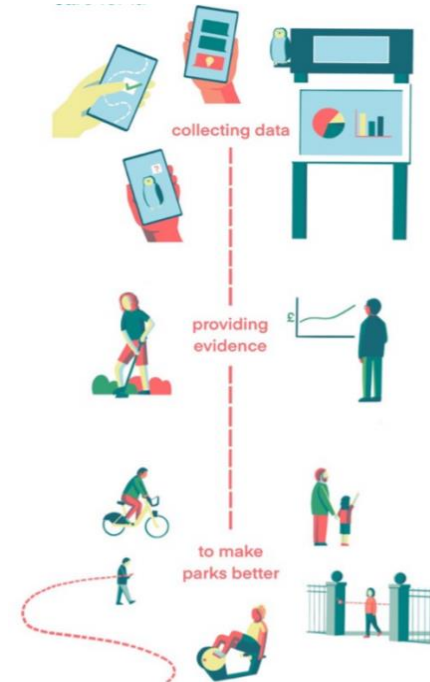

Supporting grassroots replication of community business, stewardship and **co-management models**

Prototyping - digital and data

University of Edinburgh - ParkLife Data Toolkit

Testing - contactless donations

Bournemouth Parks Foundation

The Lake District Foundation

FEEL GREAT AND DONATE: THE LAKE DISTRICT EMBRACES CONTACTLESS TECHNOLOGY

Donating to great causes that help keep the Lake District as a memorable place to visit and enjoy all-year-round doesn't get much quicker and easier than this...

Developing - effective community empowerment

Friends of Hardie Park

Friends of Lordship Rec

IT'S NOT THEIRS
IT'S OURS

A RADICAL APPROACH TO
COMMUNITY STEWARDSHIP
FROM THE FRIENDS
OF HARDIE PARK

parkscommunityuk
helping embed community empowerment in green spaces

Phase One

Initial self-assessment questionnaire tool, measuring groups' performance against key/ basic criteria for being an effective group (e.g. do you have a constitution?) and providing the relevant information and inspiration on how to improve.

Better Friend: Fundamentals

Assess how well your group is doing on the essentials of being an effective Friends group: getting tips, information and inspiration for where there's room to improve.

Phase Two

Follow up self-assessment questionnaire tools, that then deepen into specific relevant topics such as inclusiveness or a site action. Similarly to above, these questionnaires could be a stand of assessing groups' current performance and providing the necessary information and inspiration to improve.

We could poll which of its groups would be interested in living into (either in the 'fundamentals' questionnaire and/or in subsequent questionnaires).

Better Friends: Improving inclusiveness

Better Friends: Maintenance & management

Better Friends: Setting out your vision

Scaling - Parks Foundations

Bournemouth

Leeds

Bristol and Bath

Redcar and Cleveland

Making the case - Renewable energy in parks

Greenspace Scotland

Possible (10:10)

Typical park AFTER

Nb. It is obviously unlikely you would develop so many distinct projects within one site – in this case a relatively small public park. Multiple project examples are included to generate ideas for what is possible.

Challenges

1. **A lack of evidence of 'what works' is currently a barrier to adoption of innovations.**
1. **How can we connect innovators in the sector?**
1. **How is the role of a parks manager evolving?**
1. **What is the right balance of control, power and responsibility between community and parks service?**
1. **There is a continuing challenge in breaking down barriers and making a case for the value of parks.**

A close-up photograph of a person's hand raised in the air, palm facing forward. The hand is positioned on the right side of the frame. The person is wearing a watch with a dark strap and a metal case on their left wrist. The background is a blurred indoor setting, likely a social gathering or event, featuring warm, glowing string lights hanging from the ceiling. The overall atmosphere is warm and celebratory.

Thank you
