Climate Change Committee - Key Messages

- **The UK Government now has a solid Net Zero strategy in place**, but important policy gaps remain.
- **Tangible progress is lagging the policy ambition.** With an emissions path set for the UK and the Net Zero Strategy published, greater emphasis and focus must be placed on delivery.
- **Successful delivery of changes on the ground requires active management of delivery risks.** Not all policies will deliver as planned. Some may be more successful than expected, while others will fall behind.
- **Action to address the rising cost of living should be aligned with Net Zero.** There remains an urgent need for equivalent action to reduce demand for fossil fuels to reduce emissions and limit energy bills.
- **Slow progress on wider enablers.** The Net Zero Strategy contained warm words on many of the cross-cutting enablers of the transition, but there has been little concrete progress.
- **The UK must build on a successful COP26.**
