

Low Emission Vehicles, Charging and Infrastructure

Swansea
31 October 2017

A Public Sector Approach

Stephen Cirell

Introduction

- A key theme
- The public sector has a key role
- Link to wider green agenda work

Governmental Targets

- The Climate Change Act 2008
- The system under the CCA
- The EU Renewable Energy Directive

The Position of the Local Authority

- Interest in climate change
- Developing strategies
- Drawing together the strands

Drivers for Local Authorities

- Financial and non financial in nature
- Non financial include community leadership, leading by eg, jobs and growth, carbon issues and health and wellbeing
- Always a strategic approach

Electric Vehicles

- Local authorities have lots of different vehicles
- Example from the grey fleet
- Main cars and vans
- Other vehicles

Infrastructure

- The need for a strategic approach
- The importance of data
- Smaller and less experienced Councils
- Link to wider energy plans

Conclusions

- Local authorities have a key role
- The non financial elements are very important
- Those authorities getting the message have moved ahead

A Public Sector Approach
