Education Catering Unit costs and trend analysis 2015-16

PI 31b Subsidy per lunchtime meal (excluding free meals)

PI 08c Primary school paid meal uptake (all authorities)

PI 36e All meal uptake (primary & special schools)

PI 36d All meal uptake (secondary schools)

PI 17a Food only cost per lunchtime meal
(primary & special schools)

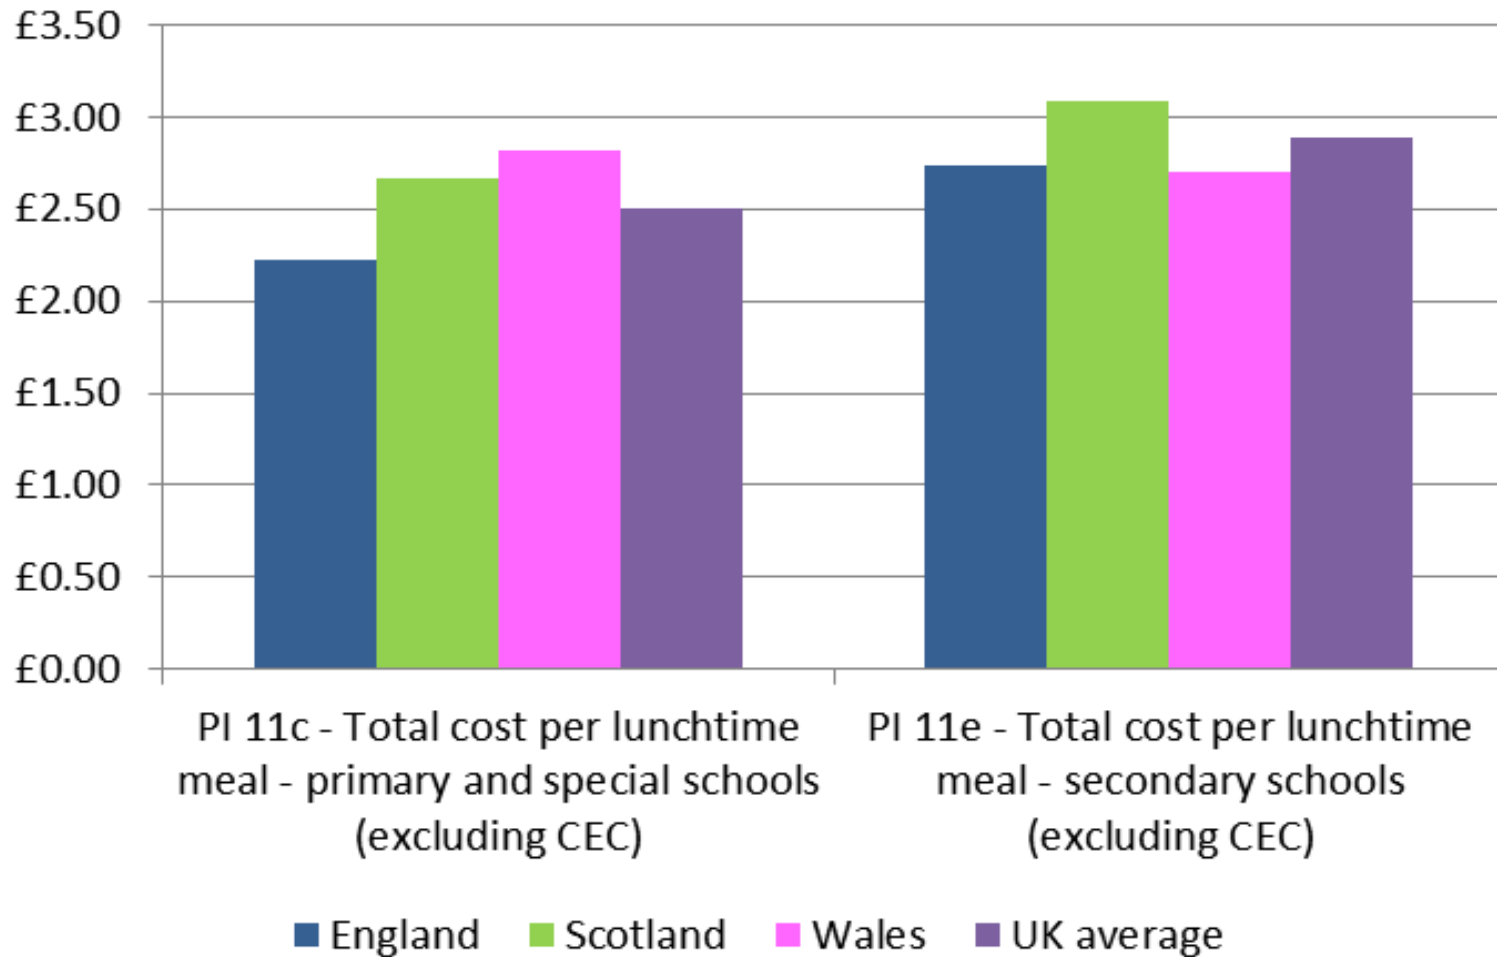

PI 18 Direct costs per lunchtime meal
(primary & special schools)

PI 12a Total cost per lunchtime meal (including CEC)

PI 15a Primary and special school lunchtime meals served per staff hour

PI 20 Unit staff cost ratio (secondary schools)

The number of schools offering a breakfast service (as a percentage of all schools) has moved in each country as shown in the following 5 year table.

	England	Scotland	Wales
2011/12	13.1%	19.7%	53.8%
2012/13	20.6%	23.7%	54.6%
2013/14	14.1%	32.8%	60.1%
2014/15	14.8%	25.8%	68.5%
2015/16	14.6%	26.9%	68.2%

Whilst the majority of PIs covered by this report relate to the lunchtime provision of school meals, outcomes on these should be set against the wider objective of 'child health' outcomes which for subscribers in Wales, includes a reported average uptake of breakfast meals at 82% across 68% of all of their primary schools

The following table shows the reported average percentage of food sourced from local suppliers across the UK over the last 5 years.

11/12	12/13	13/14	14/15	15/16
34.84%	30.29%	31.85%	37.42%	25.94%

This data may be subject to ‘spikes’ caused by any year on year change in the number or profile of submissions to the programme and any variance in subscribers interpretation of the programmes guidance on ‘locally sourced’ products.

This will be the subject of discussion (led by Elaine) later in the workshop

In Summary:

- Regional approaches remain evident in outcomes
- Greatest impact upon cost & productivity – ‘Uptakes’
- Greatest impact upon uptakes – UIFSM (E&S) and Breakfasts (W)
- Assumed contribution to Child Health outcomes??
