Debbie Cavanagh, UK Sales Manager, Safecote

Benefits and Applications of Mobile Road Weather Observations

- Why mobile observations?
- Application areas:
- Monitoring and verification
- Dynamic spreading

Michael Wall, Weather Sales Manager (Ground Transportation) at Vaisala Ltd

15:00 End

Seminar Objectives

About the Seminar

Whether it's record high summer temperatures, winter frost or extreme rainfall, local highways authorities are having to deal with the increasingly varied demands of climate change.

Response services are essential for local residents and businesses but changeable and unpredictable weather conditions, increasing litigation from the public and keeping pace with new innovation and technical developments can all add to the challenges facing the Highways Service.

All these issues and more will be discussed and debated with ample opportunity for delegates to network and learn and share ideas and information from each other.

Alongside a trade exhibition this event is a timely and affordable learning seminar for all involved in the winter maintenance and extreme weather response services.

Who should attend?

- Highways directors, heads of service and managers
- Winter maintenance specialists
- Elected members with highways, environment or neighbourhood service responsibility
- Press officers and communications team
- Suppliers who want to learn about the latest developments from a commercial perspective

Venue
