Future of Energy.

Unleashing Net Zero.

30 OF UK PRIVATE AND
PUBLIC SECTOR ENERGY IS
% WASTED.

Enough to Power
**GREATER
LONDON**
for 7 years.

£34bn

Vision.

Making net zero possible and profitable for all organisations.

Mission.

Eliminating energy waste and making net zero profitable.

Achieve Net Zero with no upfront cost. Yes, really.

Save energy and reduce your carbon footprint
by improving four fundamental areas.

Let's embark on your journey to Net Zero.

Access cleaner energy.

Access cleaner energy at the lowest cost from our online marketplace and deploy capital free onsite solar generation.

Measure your waste.

Capture real-time actionable energy data and insights, eliminating waste, unnecessary costs and carbon emissions.

Reduce carbon and costs.

Switch to energy efficient technologies with zero upfront cost, saving energy and reducing carbon.

Connect sustainably.

Deploy capital free fast and rapid EV charging points, and onsite solar generation for a sustainable future.

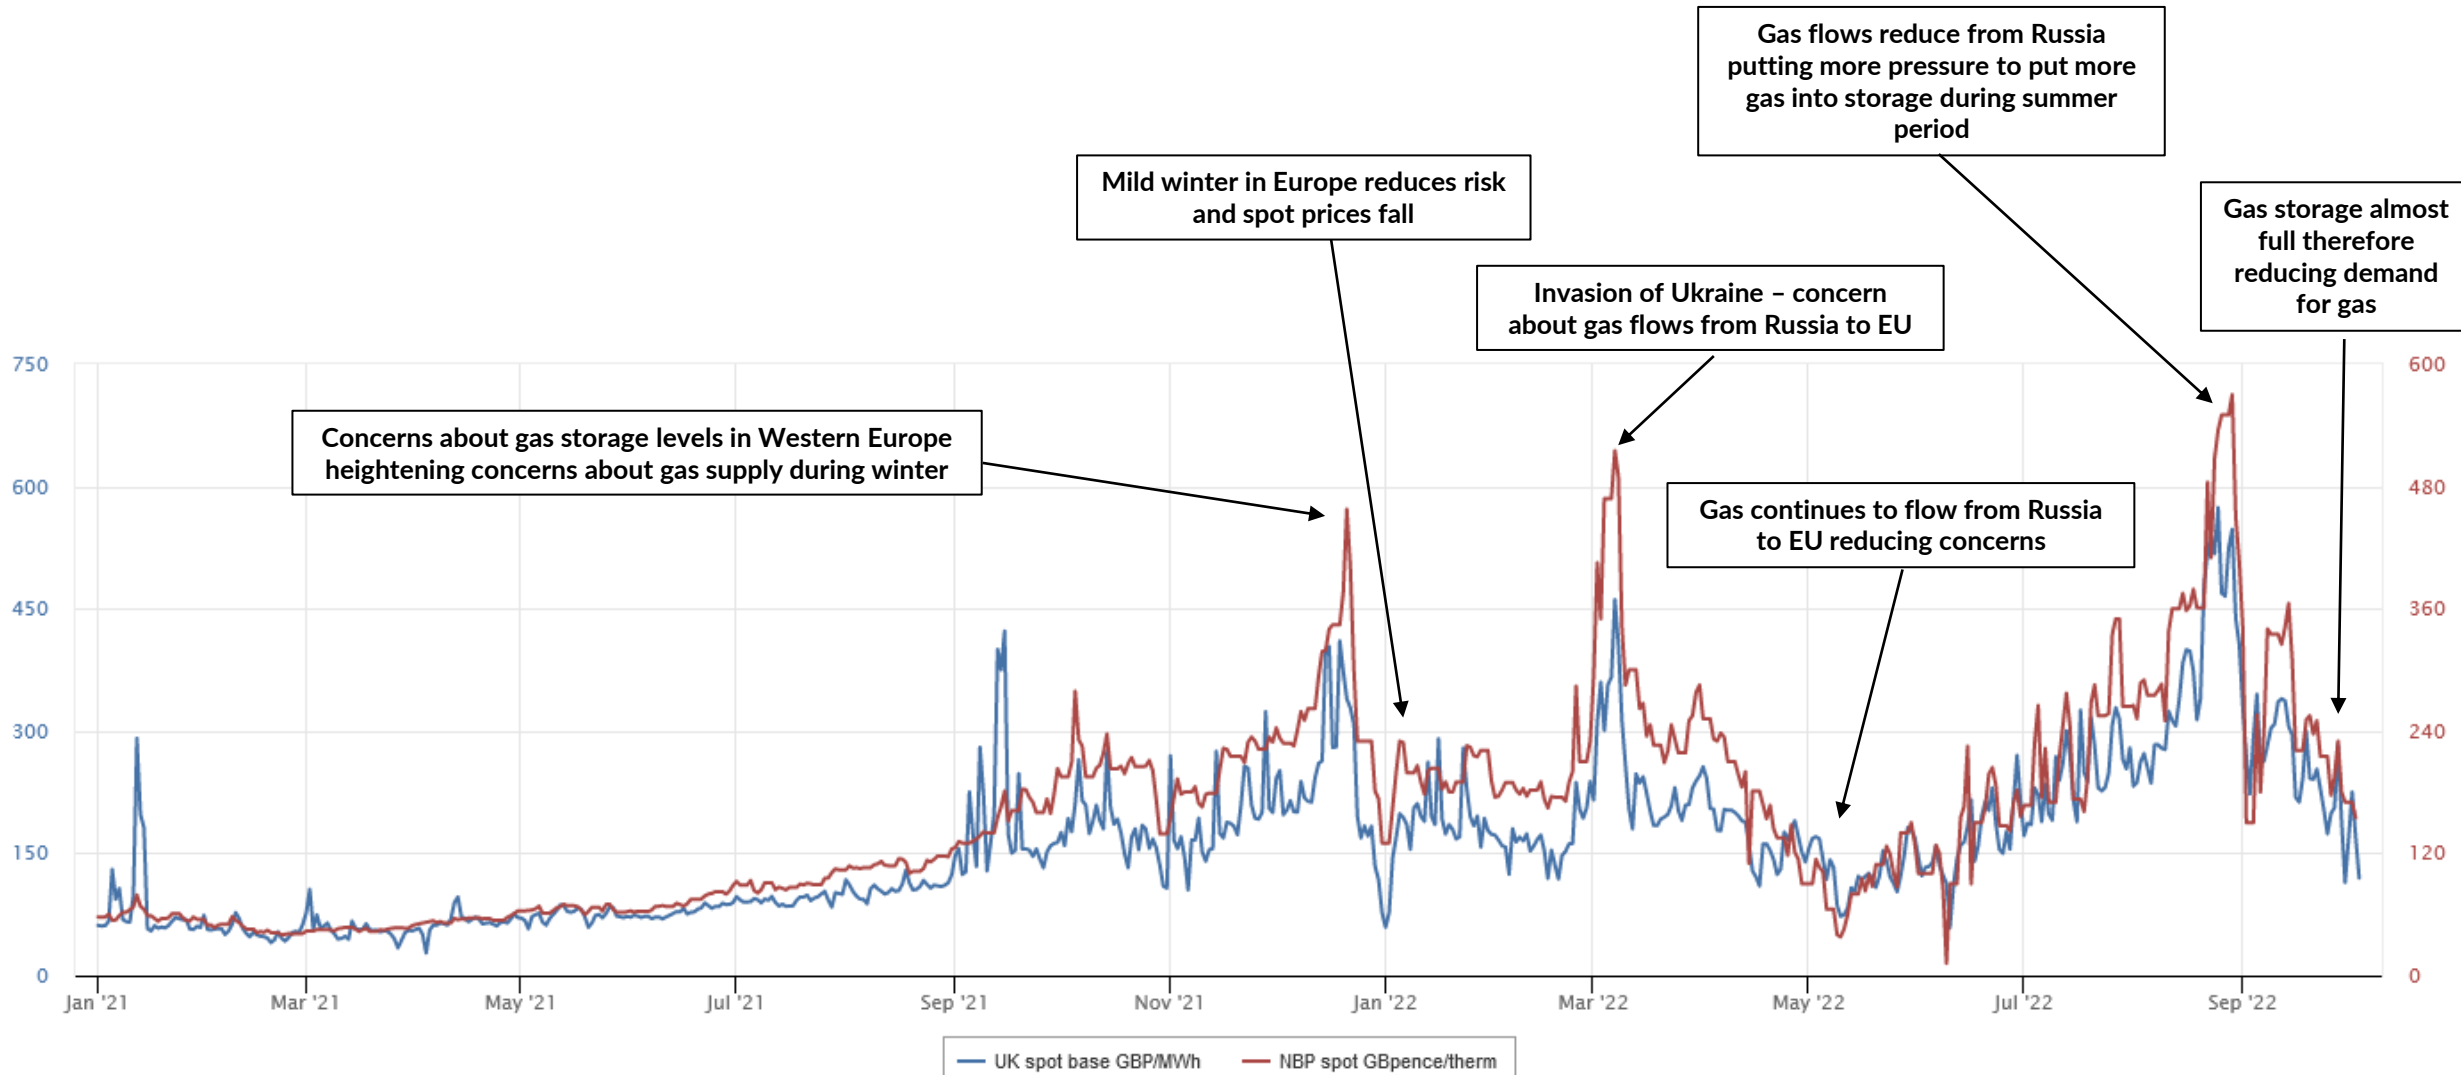

Access cleaner energy at the lowest cost.

Access cleaner energy at the lowest cost from our online marketplace and deploy capital free onsite solar generation.

Whatever your energy strategy we'll help you access the lowest cost clean energy. Whether that's procuring energy through our online marketplace or the installation of capital free onsite solar. We will ensure your energy strategy is proactively managed, so your costs are minimised and you comply with environmental legislation.

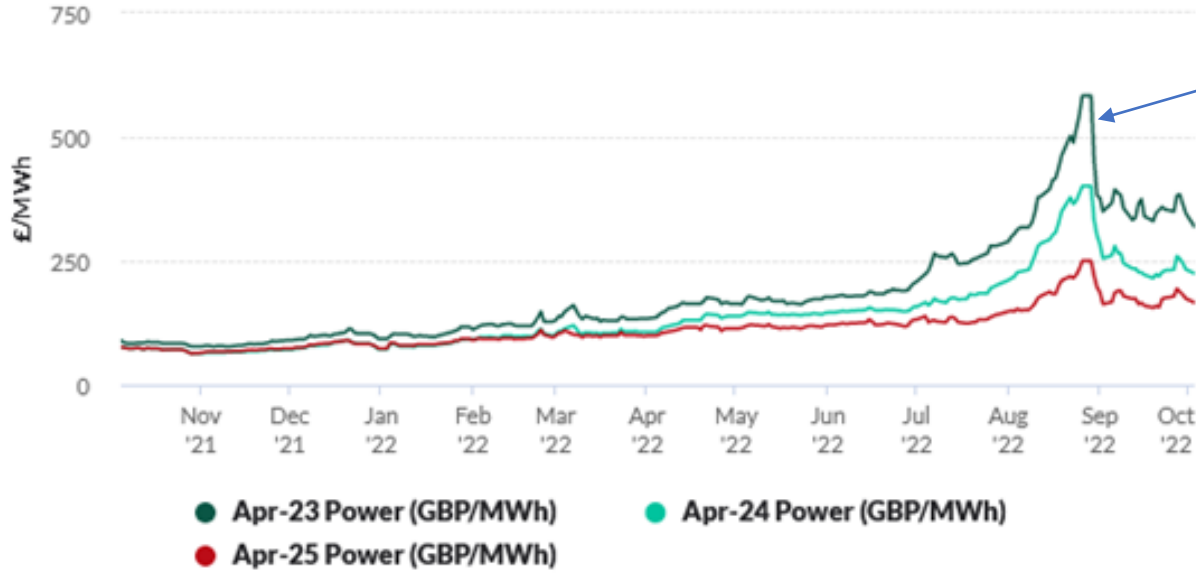

• MARKETS – Day Ahead.

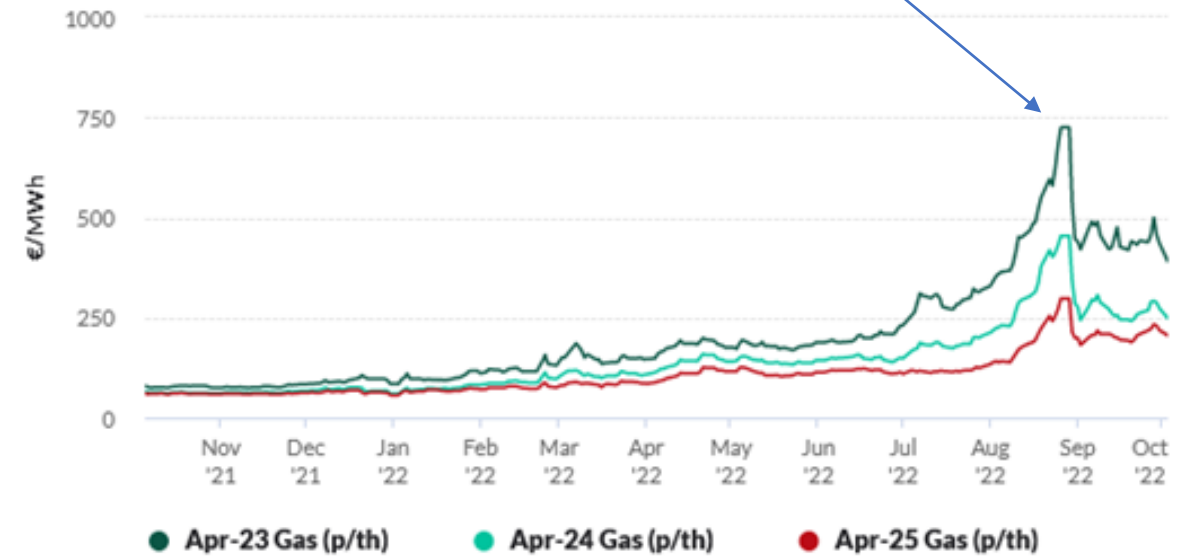

• LONG-TERM PRICE FORECAST.

⚡ Power 12M from Apr

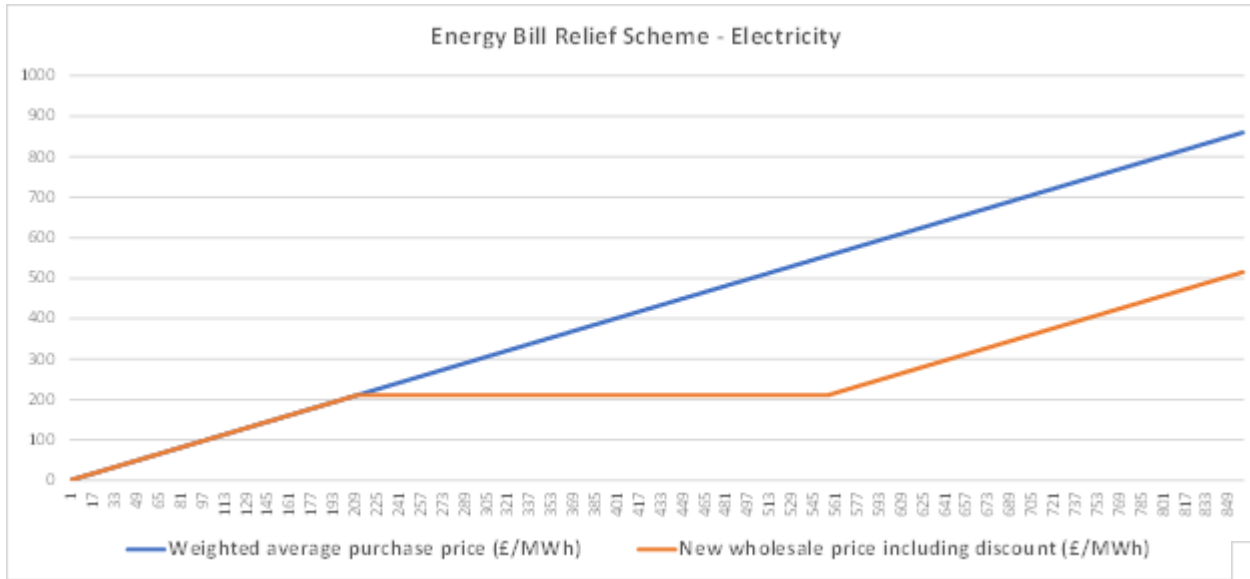

Forward curve rises as there is an expectation that the situation in Ukraine will be drawn out for many months and gas supply is likely to be severely disrupted into 2023 and maybe 2024.
Forward prices rising to well over 10 times the 15 year average!!

⚡ Gas 12M from Apr

• Price Cap in Practice.

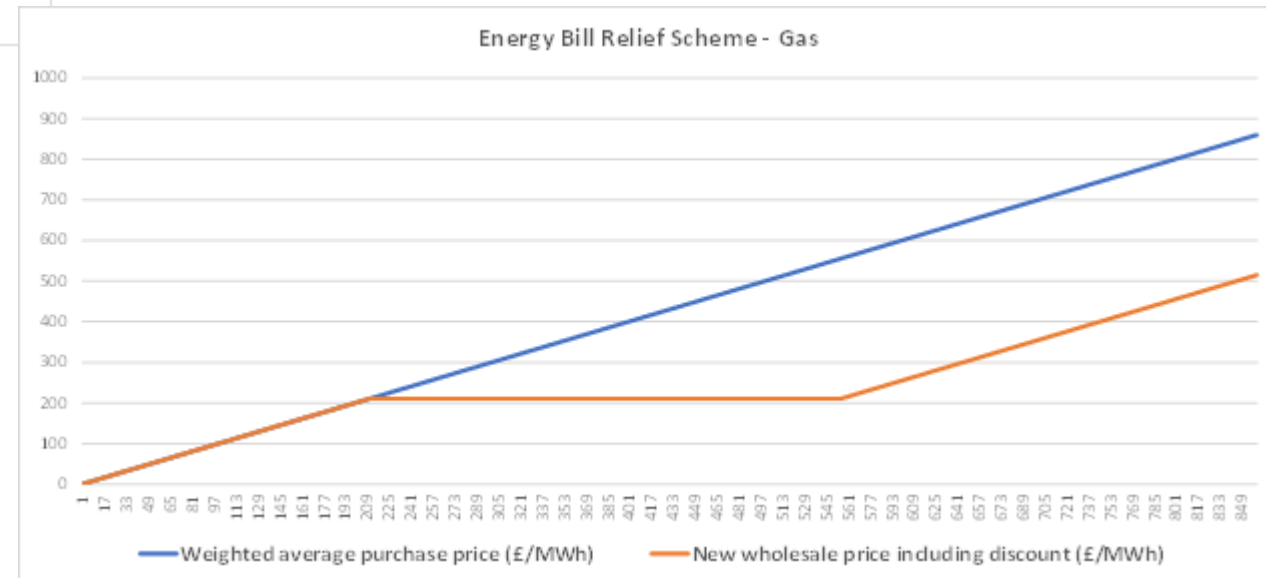

What we know:

- Supported Wholesale Price (£211/MWh for electricity and 7.5p/kWh for gas)
- Support for energy usage from 1st October 2022 to 31st March 2023
- Discounts will be applied to fixed price contracts
- You don't need to do anything. This will be dealt with by suppliers through billing

What we don't know:

- How suppliers will bill this
- The exact discounts for those on fixed price contracts

• WHAT DOES THIS MEAN FOR YOU?

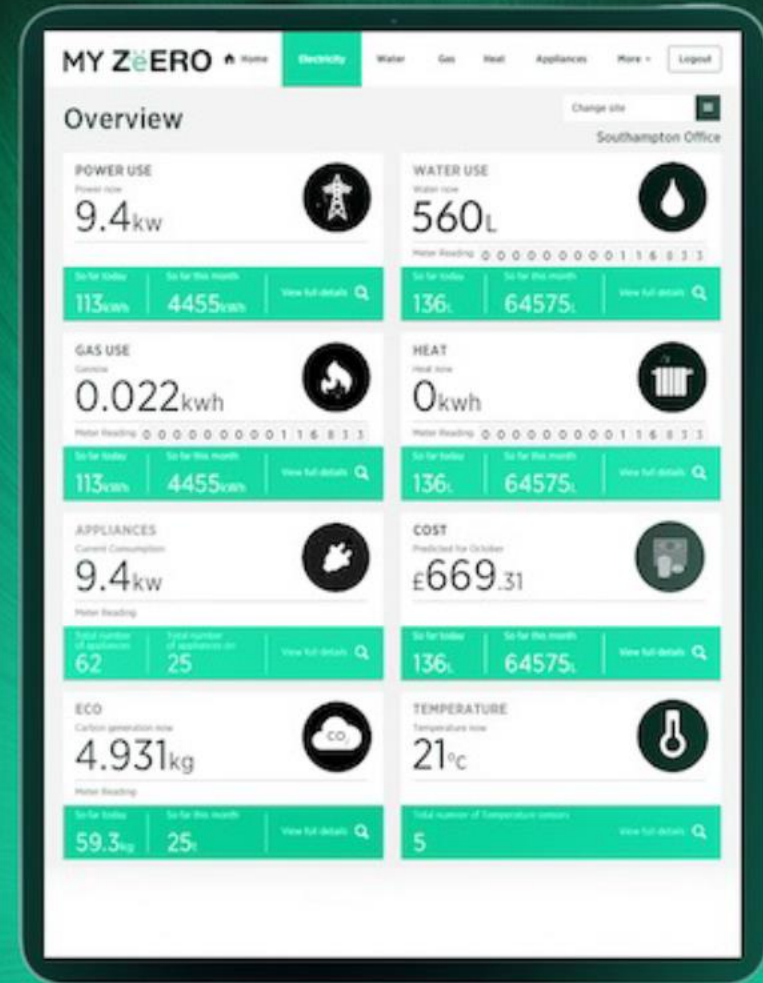

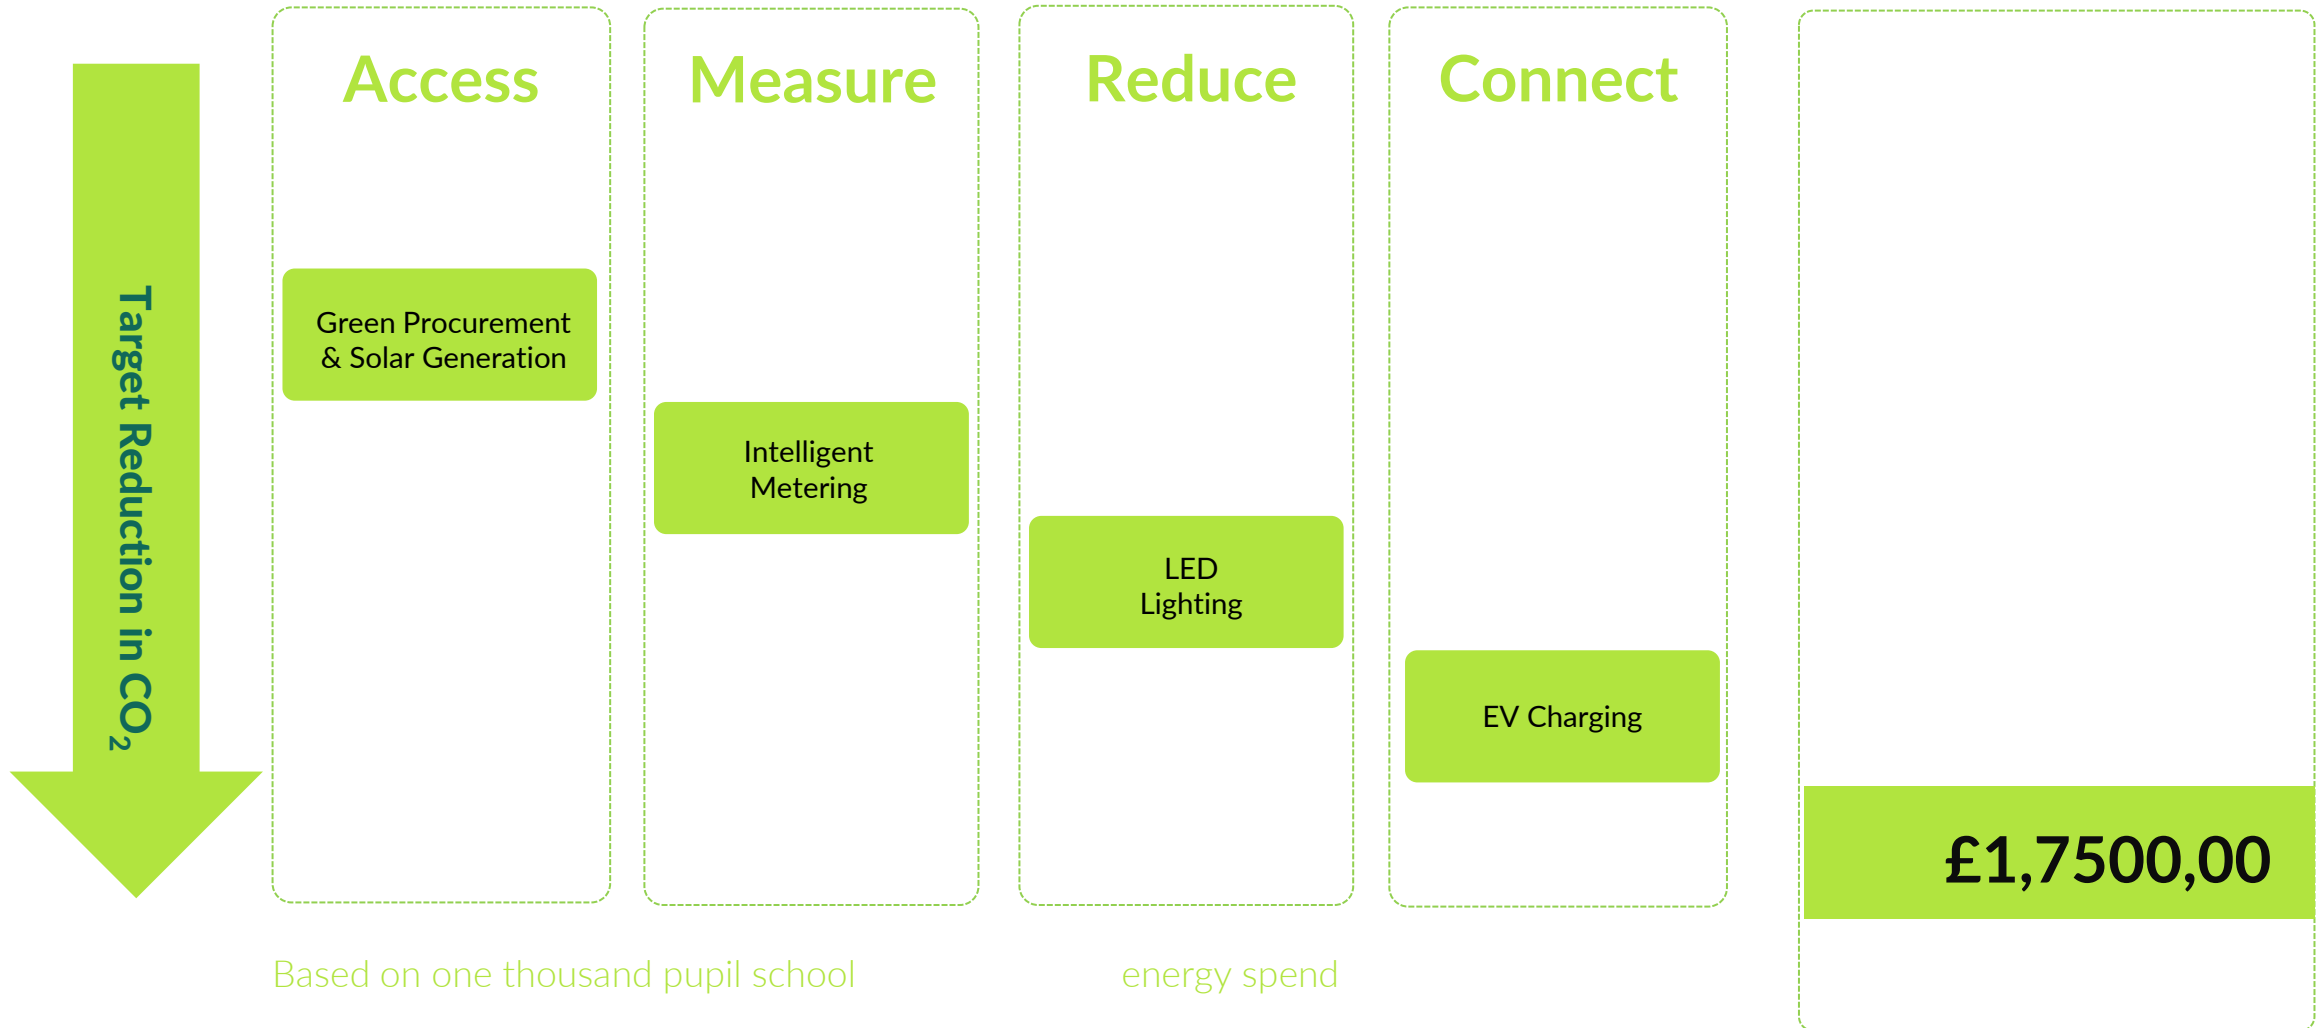

Measure, manage and visualise your energy use.

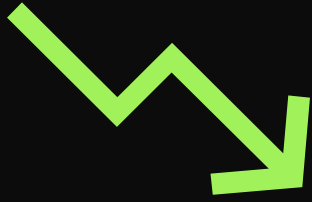

Get real-time energy data to eliminate waste, cut costs and reduce carbon emissions.

Measurement underpins any successful energy management strategy. By deploying our market leading technology MY ZeERO, you will be able to visualise energy data down to an individual circuit level. Our team of energy experts will then use this data to deliver valuable data insights identifying ways to reduce your energy consumption by up to as much as 30%.

• eEnergy Carbon Waterfall.

Reduce energy consumption, costs and carbon.

Eliminate energy waste, cut your energy costs and reduce your carbon footprint with no upfront costs.

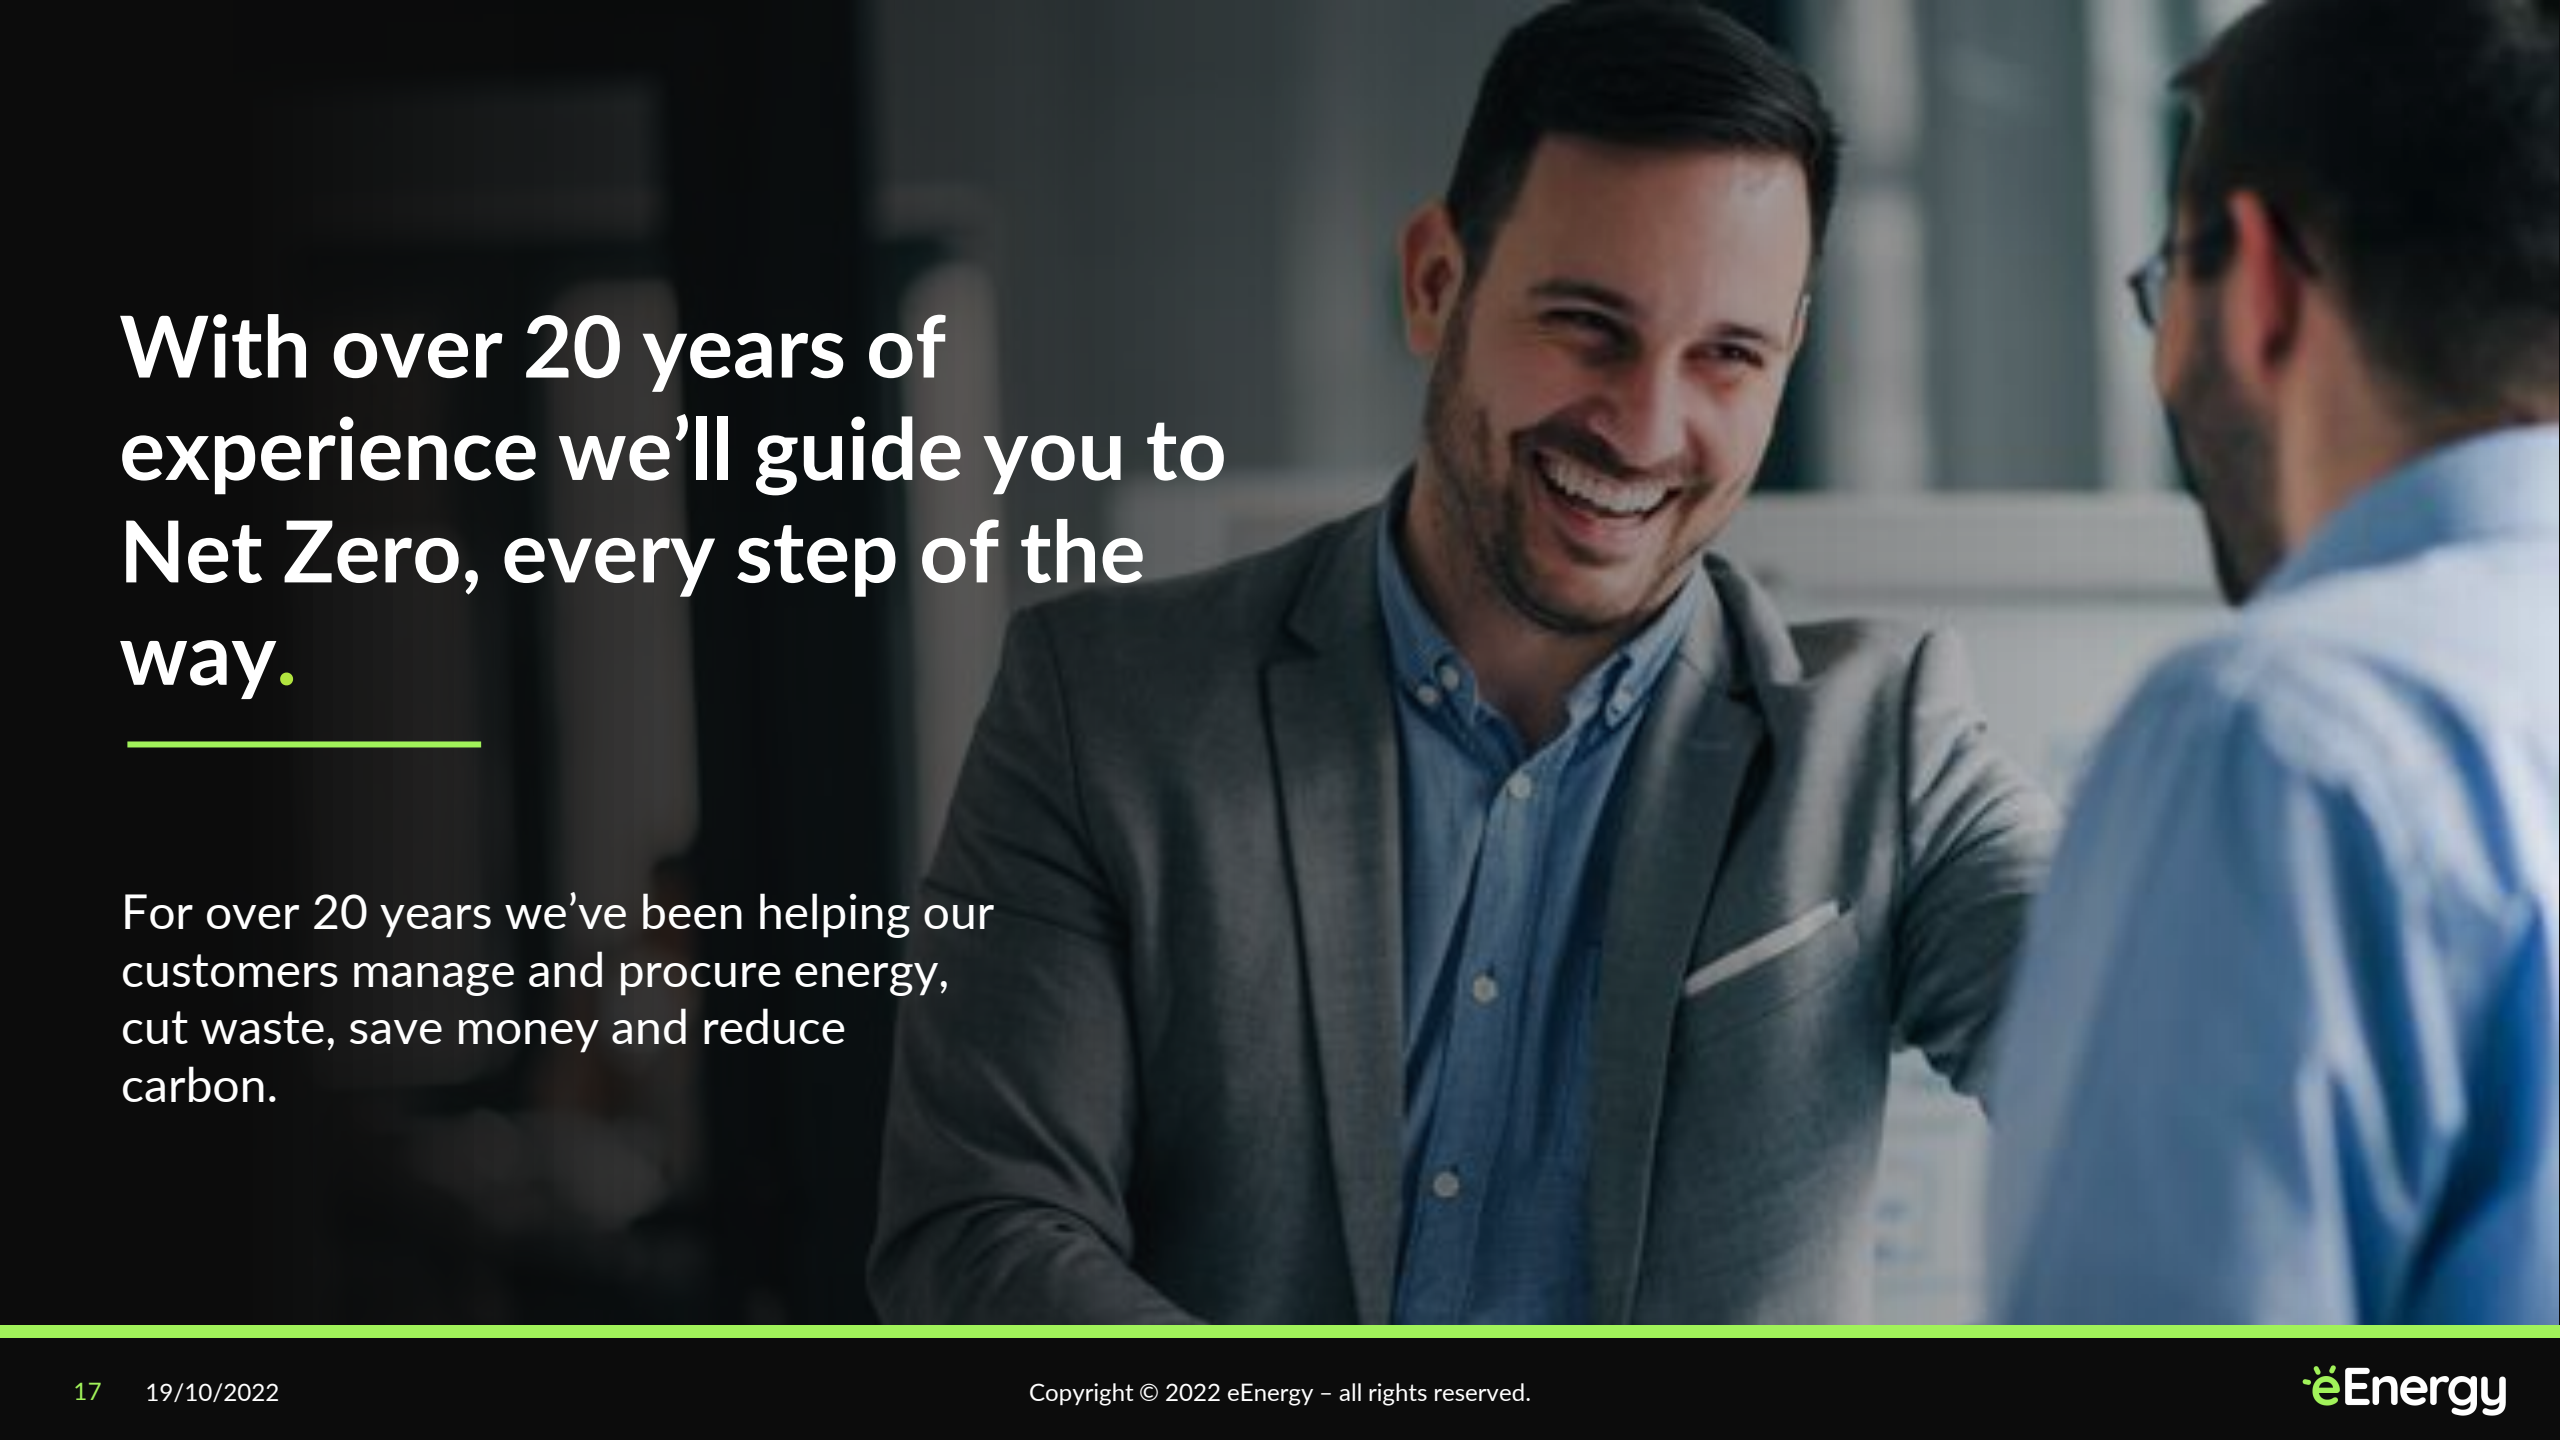

Unlock energy savings by reducing your consumption capital-free. We handle the upfront cost, installation and maintenance tailored energy efficiency solutions such as LED lighting. Unlock cash savings from day one.

We've reduced energy use for Bellevue by 24%.

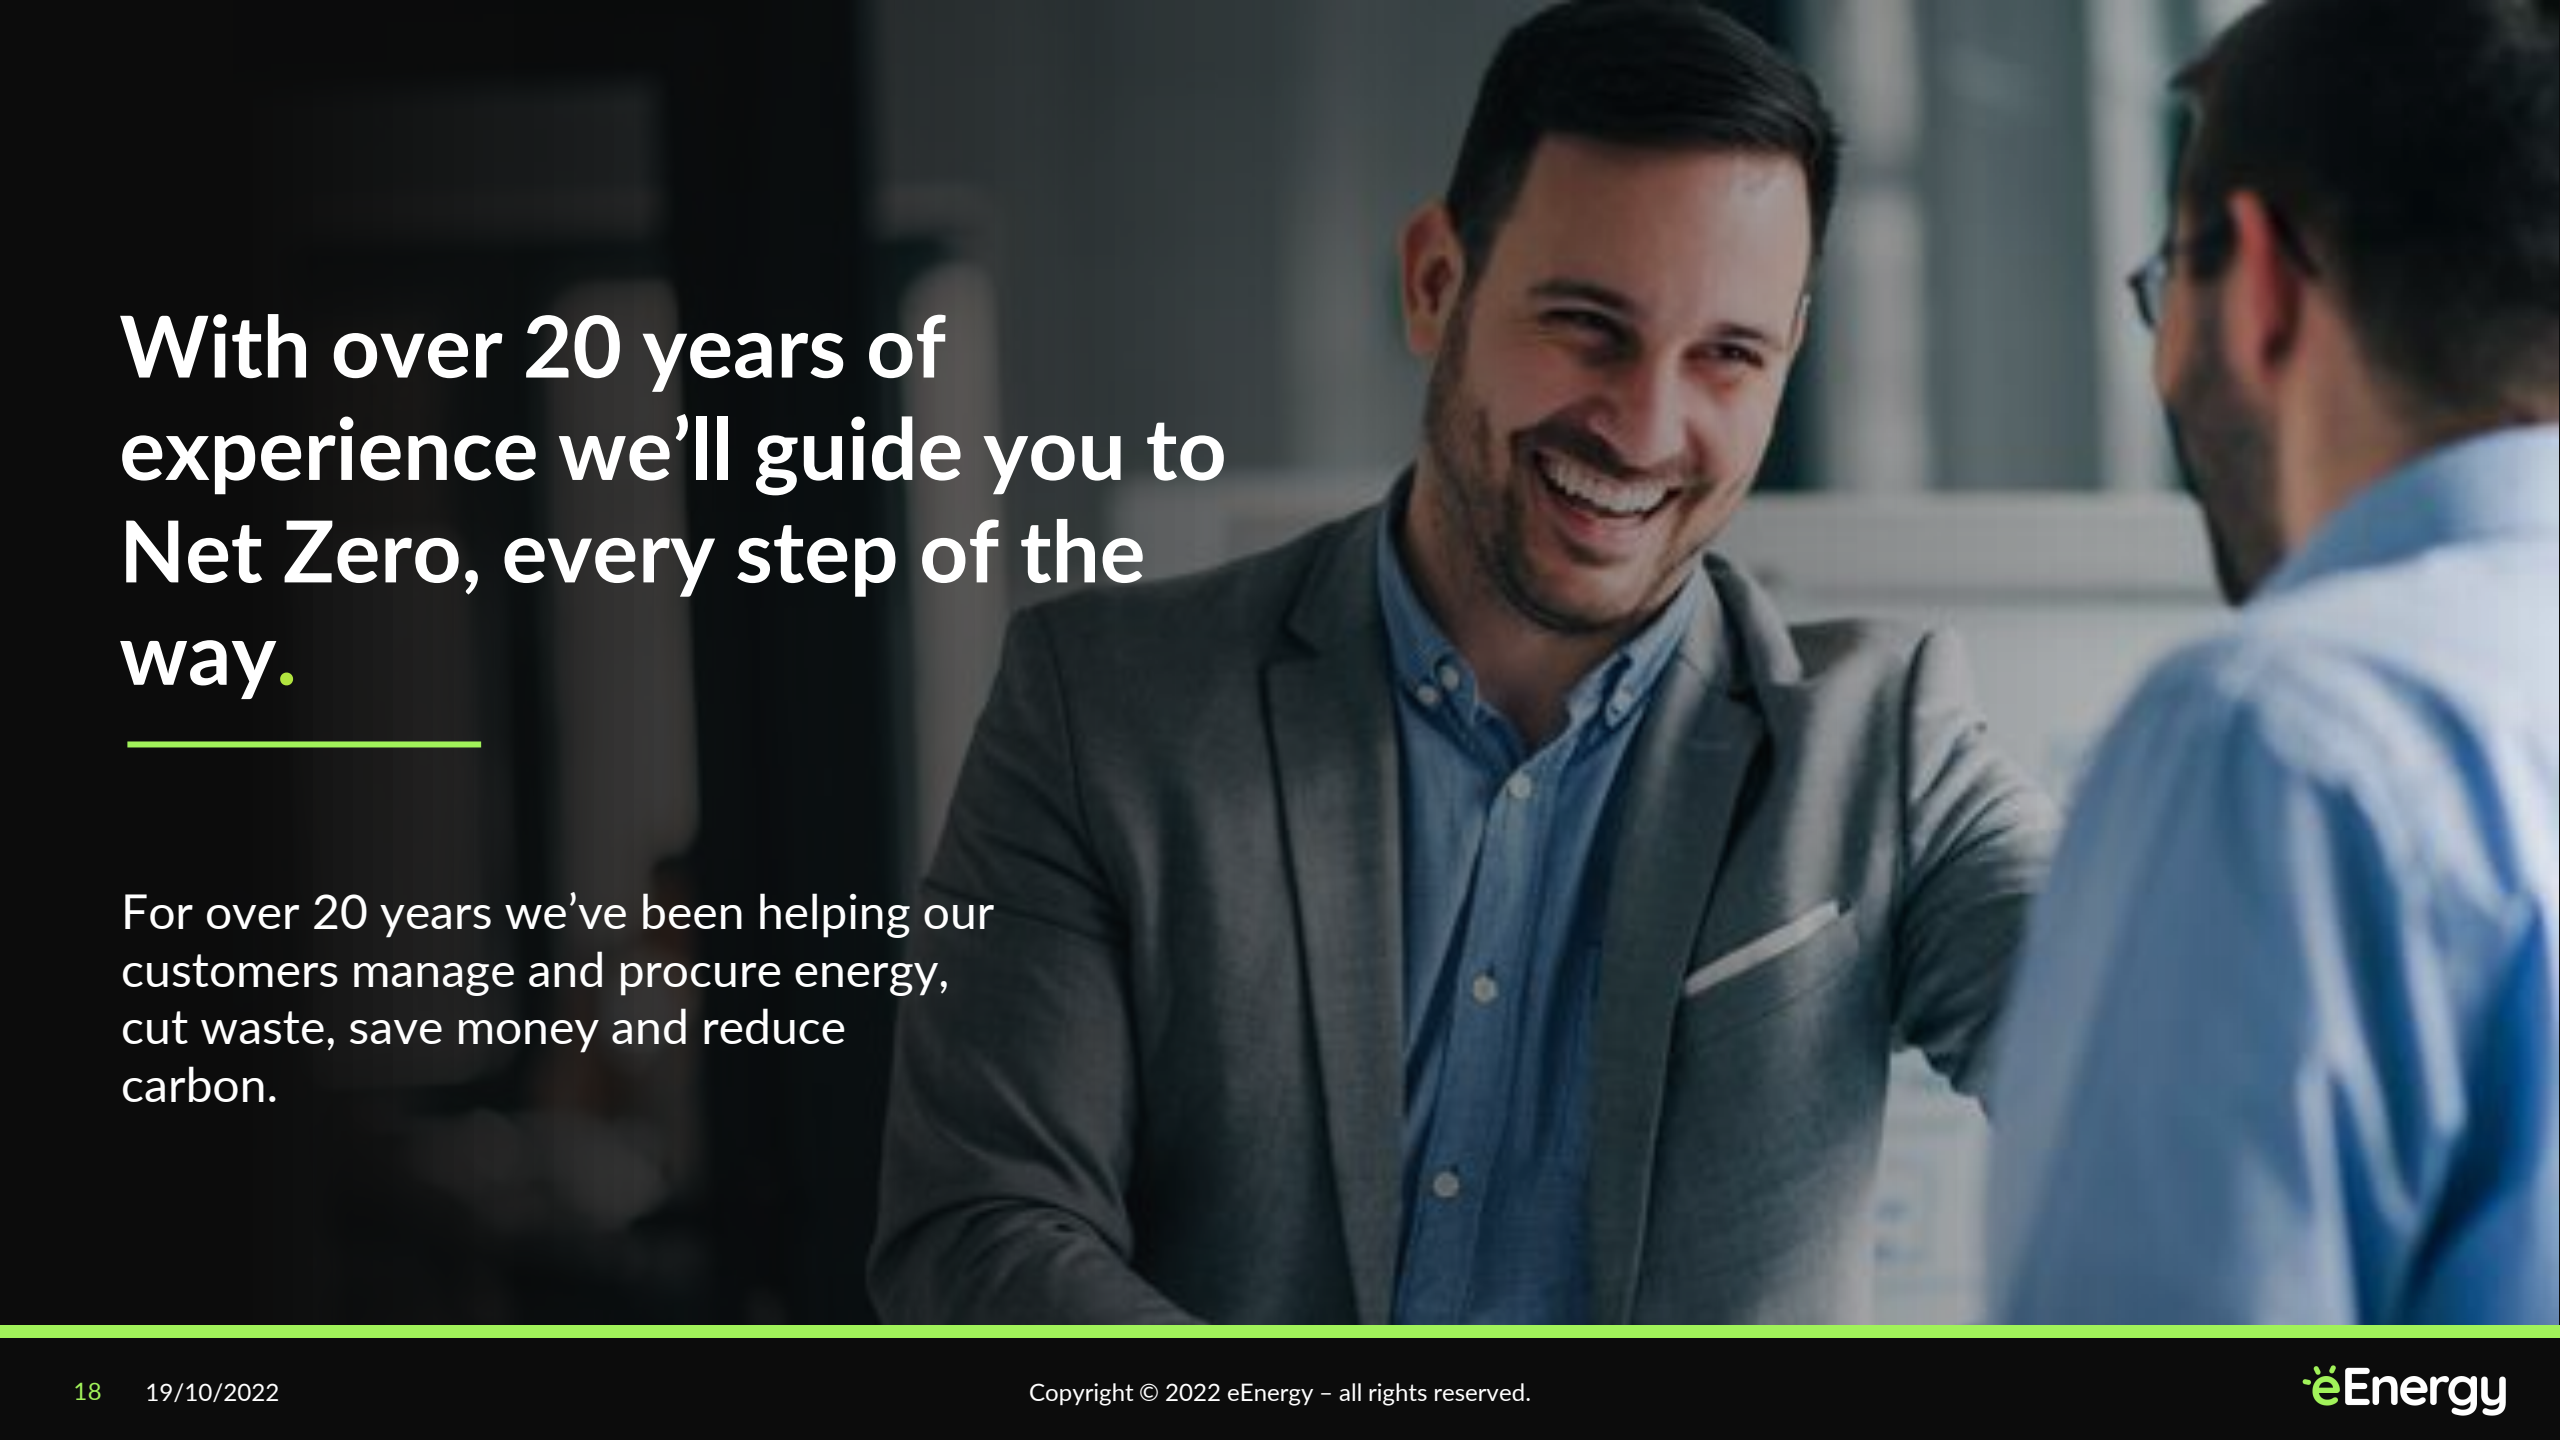

Our energy use has gone down between 24% and 37% across our 12 schools. In one school we were spending £1,200 a month on our energy usage and that has now come down to £750. We know we can get that down more from the data and insights eEnergy are providing us via MY ZeERO.

Mark Greatrex
CEO, Bellevue Place Education Trust

**With over 20 years of
experience we'll guide you to
Net Zero, every step of the
way.**

For over 20 years we've been helping our customers manage and procure energy, cut waste, save money and reduce carbon.

A photograph of two men in business attire. The man in the foreground is smiling broadly, wearing a grey blazer over a blue button-down shirt. The man in the background is seen from the side, wearing a blue shirt and glasses. They appear to be in a professional office environment.
